**Note:** This is the current situation based on latest information gathered from the respective markets and T2S. Should there be any changes we will inform you accordingly.

Clearstream Banking will implement the required adaptations to its systems in order to comply with the T2S mandatory specifications of Euroclear Belgium, Euroclear France, Euroclear Nederland, VP Securities (Denmark) and VP LUX (Luxembourg) as well as those of its agents and/or depositories.

Customers are required to make the changes to their settlement instructions sent to Clearstream Banking as detailed below. Customers should also be aware of some changes to current market practices and align with their counterparties accordingly, where relevant.

- · T2S settlement day and timings;
- · Instruction types;
- · Identification of CSDs in T2S;
- Identification of parties to settlement instruction;
- Matching rules;
- Countervalue difference;
- Allegements;
- Linked / back-to-back instructions;
- Hold and release;
- Partial settlement;
- · Recycling rules;
- Bilateral cancellation;
- Market claims and transformations.

All changes are applicable to the Clearstream Banking links to Euroclear Belgium, Euroclear France, Euroclear Nederland, VP Securities and VP LUX unless otherwise mentioned.

**VP Securities note:** Settlement against Danish Krona (DKK) will remain outside T2S in the interim and will eventually be migrated into T2S in 2018. Also, free of payment transfers between VP Securities client accounts will not settle in T2S, but in the VP legacy system in the interim period.

# T2S settlement timings

Note: All times are Central European Time (CET).

The settlement day in T2S will consist of the following steps:

- Start of day (SOD) preparation period from 18:45 to 20:00 on SD-1;
- Night-time settlement (NTS) from 20:00 on SD-1 until at the latest 03:00 on SD;
- Maintenance cycle from 03:00 to 05:00 during which no settlement takes place;
- Real time settlement from 05:00 to 18:00;
- End of day processing from 18:00 to 18:45.

The following settlement deadlines will be applicable to customers:

| Link   | Current EUR AP<br>deadline | Future T2S<br>EUR AP<br>deadline | Current<br>FOP<br>deadline | Future T2S<br>F0P<br>deadline |
|--|----------------------------|----------------------------------|----------------------------|-------------------------------|
| Euroclear Belgium (EBE) SA/NV operated<br>by BNP Paribas Securities Services<br>(PB2S) Paris | 15:45 SD                   | 15:45 SD                         | 15:45 SD                   | 17:45 SD                      |
| Euroclear France (EF) operated by BNP<br>Paribas Securities Services (PB2S) Paris            | 15:45 SD                   | 15:45 SD                         | 15:45 SD                   | 17:45 SD                      |
| Euroclear Nederland (EN) operated by<br>BNP Paribas Securities Services (PB2S)<br>Paris      | 15:45 SD                   | 15:45 SD                         | 15:45 SD                   | 17:45 SD                      |
| VP Securities operated by Danske Bank<br>Copenhagen  | 11:45 SD                   | 14:00 SD                         | N/A                        | N/A                           |
| VP LUX (direct link)   | 16:15 SD                   | 15:45 SD                         | 18:00 SD                   | 17:45 SD                      |

# **Instruction types**

In addition to allowing settlement free of payment and against payment in EUR, T2S will introduce the following new instruction types: PFOD (Payment Free Of Delivery), DWP (Delivery With Payment) and RWP (Receipt With Payment).

Customers can settle free of and against payment in EUR via Clearstream Banking in line with the requirements provided in this announcement. However, PFOD, DWP and RWP instructions will not be supported by Clearstream Banking in wave 3 and Clearstream Banking will reject such instructions if received from customers.

**VP Securities note:** Free of payment instructions are not settled in T2S, but in the VP legacy settlement system.

## Identification of CSDs in T2S

In T2S, all CSDs will be identified by their BIC11. Customers are required to use the following BIC11 as Place of Settlement for domestic instructions in Euroclear Belgium, Euroclear France, Euroclear Nederland, VP Securities and VP LUX in their settlement instructions:

| CSD                 | BIC11       |
|---------------------|-------------|
| Euroclear Belgium   | CIKBBEBBXXX |
| Euroclear France    | SICVFRPPXXX |
| Euroclear Nederland | NECINL2AXXX |
| VP Securities       | VPDKDKKKXXX |
| VP LUX              | VPLULULLXXX |

For cross-border transactions, the Place of Settlement must contain the BIC of the counterparty's CSD. The Place of Settlement list proposed in CreationOnline will be amended accordingly.

**Note:** Cross-border Settlement between CSDs in T2S is only possible, if the corresponding technical configuration in T2S for cross-border links has been established by the CSDs linked to each other.

If a customer uses a BIC8 to identify the Place of Settlement, Clearstream Banking shall be entitled to modify the BIC8 provided and the settlement instructions will be then processed by default with a BIC11 by adding the default XXX suffix to comply with T2S settlement rules. Accordingly, such customers agree to indemnify Clearstream Banking against losses, liabilities, damages, penalties, expenses and all other costs of any kind suffered by Clearstream Banking as a result of the customer not complying with the above requirement of using BIC11.Identification of settlement parties

#### Identification of the counterparty in the customer instruction

In T2S, the CSD participants are identified exclusively by the combination of their home CSD (SWIFT: PSET or CreationOnline: Place of settlement), that is, the PSET shall be the BIC of the CSD the counterparty uses to access T2S, and their BIC11 (SWIFT: REAG/DEAG or CreationOnline: Receiving/Delivering Agent).

If a customer uses a BIC8 to identify the Receiving/Delivering Agent, Clearstream Banking shall be entitled to modify the BIC8 provided and the settlement instructions will be then processed by default with a BIC11 by adding the default XXX suffix to comply with T2S settlement rules. Accordingly, such customers remain liable for any settlement fails that the use of the BIC8 may cause and the customers furthermore agree to indemnify Clearstream Banking against losses, liabilities, damages, penalties, expenses and all other costs of any kind suffered by Clearstream Banking as a result of the customer not complying with the above requirement.

Multi-market securities where the home and remote markets are both in T2S will no longer be identified with a Remote Common Code. As such, the Place of Safekeeping should no longer be used and Clearstream Banking will ignore any Place of Safekeeping equal to another CSD that has already migrated to T2S. Cross-CSD instructions between two In-CSDs are identified in T2S when the CSD of the instructing party and that of its counterparty are different.

### Procedure for customers' counterparties

Customers are requested to inform their local counterparties to use the following details for instructions sent via Euroclear Belgium, Euroclear France, Euroclear Nederland, VP Securities and VP LUX that settle against Clearstream Banking in T2S:

BIC11 of Clearstream Banking: CEDELULLXXX

In favour of/By order of: Customer BIC11 and account number of the Clearstream customer

**Note:** T2S does not report the account field with second party level in the allegement messages and we therefore recommend customers to request their counterparties to include the CBL account number in field :70C::PACO instead of :97A::SAFE. The usage of :70C::PACO is not recommended for the ESES markets.

# Matching rules

#### **General matching requirements**

The matching of instructions with counterparties in Euroclear Belgium, Euroclear France, Euroclear Nederland, VP Securities and VP LUX will take place in T2S. The following criteria are mandatory for free of and against payment instructions in T2S:

- · Payment type;
- Securities movement type (values match opposite);
- ISIN code;
- Trade date;
- Settlement quantity;
- Intended settlement date:
- Delivering party BIC;
- · Receiving party BIC;
- CSD of delivering party;
- CSD of receiving party.

For against payment transactions, the following criteria are also mandatory:

- Currency;
- Settlement amount.

#### Additional and optional matching fields

T2S also provides additional and optional matching fields.

# Additional matching fields

The following additional matching fields are available in T2S:

- Opt-out indicator;
- Cum/Ex indicator.

These additional matching fields are initially not mandatory but, when one of the counterparties provides a value for them in its instruction, matching values must be provided by the other counterparty.

In their instructions to Clearstream Banking, customers may use the following fields:

| Type and purpose of the additional matching field                | Creation via SWIFT and CreationDirect | CreationOnline    |
|--|---------------------------------------|-------------------|
| Opt out indicator  | :22F::STCO//NOMC                      | Opt-out indicator |
| Customer wishes to opt out from market claims or transformations |                                       |                   |
| Cum indicator  | :22F::TTCO//CCPN                      | CUM/EX indicator  |
| Customer wishes to indicate its transaction as cum coupon        |                                       |                   |
| Ex indicator   | :22F::TTCO//XCPN                      | CUM/EX indicator  |
| Customer wishes to indicate its transaction as ex coupon         |                                       |                   |

The customer must ensure that their counterparty indicates the same opt-out and cum/ex indicator at instruction level; otherwise, the instructions will not match.

## Optional matching fields

The following optional matching fields are available in T2S:

- Common reference;
- Client of delivering/receiving CSD participant;
- Securities account of the delivering/receiving CSD participant.

These optional matching fields are initially not mandatory and when one counterparty includes a value and the other does not, the instructions will match.

If both parties provide a value, this value must be identical in both instructions in order for them to match. If this is not the case, the instruction remains unmatched.

**VP Securities note:** The Common Reference is not available in VP as an optional matching field in T2S and should not be used by customers with counterparties that access T2S via VP Securities.

In their instructions to Clearstream Banking, customers may use the following fields:

| Type and purpose of the optional matching field  | Creation via SWIFT and<br>CreationDirect | CreationOnline                       |
|--|--|--------------------------------------|
| Common reference   | :20C::COMM                               | Common Trade Reference               |
| Customer wishes to indicate a reference agreed with the counterparty                       |  |                                      |
| Client of delivering CSD participant   | :95a::SELL                               | Client of delivering CSD participant |
| Customer wishes to specify the BIC11 or local code of the counterparty's underlying client |  |                                      |
| Client of receiving CSD participant  | :95a::BUYR                               | Client of receiving CSD              |
| Customer wishes to specify the BIC11 or local code of the counterparty's underlying client |  | participant                          |

| Type and purpose of the optional matching field       | Creation via SWIFT and<br>CreationDirect | CreationOnline                             |
|---|--|--|
| Securities account of the delivering party            | :97A::SAFE with:95a::DEAG                | Securities account of the delivering party |
| Customer wishes to specify the counterparty's account |  |  |
| Securities account of the receiving party             | :97A::SAFE with:95a::REAG                | Securities account of the receiving party  |
| Customer wishes to specify the counterparty's account |  |  |

Customers can use the above optional matching criteria to reduce the risk of cross-matching.

Note: CBL's securities account number (SAC) in T2S can be used by counterparties as optional

matching criteria to avoid cross-matching:

Euroclear Belgium: SAC CIKBCEDELULLXXX000L10
Euroclear France: SAC SICVCEDELULLXXX000L10
Euroclear Nederland: SAC NECICEDELULLXXX000L10

VP Securities: SAC VPDK044443069292909

VP LUX: SAC VPLU36200360002000

## Reporting related to additional and optional matching fields

Clearstream Banking has adapted its best matching algorithm to take into account the additional matching criteria and report any mismatch accordingly. In the case of optional matching fields, a mismatch will only be reported if present on both the allegement and the customer instruction.

Any mismatch on the new matching criteria will be reported as follows:

| Matching field         | Reason codes in Creation via SWIFT and CreationDirect | Free text provided in narrative field                     |
|------------------------|---|---|
| Common Reference       | :25D::INMH NMAT<br>:24B::NMAT IIND                    | /COMM/common ref on MT578 received by Clearstream Banking |
| Place of Settlement    | :25D::INMH NMAT<br>:24B::NMAT DEPT                    | /PSET/PSET on MT578 received by Clearstream Banking       |
| Market Claim Indicator | :25D::INMH NMAT<br>:24B::NMAT NARR                    | /STCO/NOMC  |
| Ex/Cum Indicator       | :25D::INMH NMAT<br>:24B ::NMAT NARR                   | /TTCO/CCPN or XCPN  |

**Note:** There is no change in CreationOnline.

## **Unmatched instructions**

T2S does not report unmatched statuses on instructions that have failed to match in accordance with the T2S matching criteria. This means in practice that Clearstream Banking may not receive a status from its local agent/depository.

This change of service can be partly mitigated by customers via the allegement and matching service offered by Clearstream Banking. Clearstream Banking attempts to match customer instructions with the allegement received from its agents/depositories and reports to customers either an inferred matching or mismatch reason using the INMH status. In order for this service to be optimal we

encourage customers to request that their counterparties quote the customer's Clearstream Banking account number in the counterparty's instructions.

## Countervalue difference

The following T2S cash tolerances will apply to instructions against counterparties in Euroclear Belgium, Euroclear France, Euroclear Nederland, VP Securities and VP LUX (against payment instructions in EUR only):

- EUR 2 for transactions with an amount equal to or less than EUR 100,000; and
- EUR 25 for transactions with an amount greater than EUR 100,000.

Clearstream Banking will adapt its best matching algorithm when comparing the settlement amount accordingly.

# **Allegements**

T2S will send allegement messages depending on the information indicated in the counterparty's instruction. Clearstream Banking may receive counterparty instructions alleged on its account at Euroclear Belgium, Euroclear France, Euroclear Nederland, VP Securities and VP LUX and will report them to customers provided that the customer's Clearstream Banking account is present in the allegement and the allegement subscription is in place on the customer account.

The allegements will contain the additional and optional matching criteria described above. These can be used to correctly format instructions to ensure matching if it has not yet been sent to Clearstream Banking.

## Linked instructions (back-to-back)

T2S provides functionality to link settlement instructions together. Clearstream Banking continues to offer instruction linking on its links to Euroclear Belgium, Euroclear France and Euroclear Nederland via the existing back-to-back (B2B) service. The format for B2B instructions will remain unchanged.

**VP Securities and VP LUX note:** The linking of settlement instructions (back-to-back) will not be available for VP Securities and VP LUX eligible securities.

## Hold and release

The hold and release feature available in T2S will be used by Clearstream Banking for pre-matching only. Therefore, once the customer's instruction is provisioned and released to the market, it will no longer be possible to place the instruction on hold.

If the customer's counterparty has placed its instruction on hold, we will report status/reason as follows:

Creation via SWIFT and CreationDirect: SETT//PENx PENx//PRCY

CreationOnline: Counterparty Instruction on Hold in CreationOnline.

**VP Securities and VP LUX note:** The T2S functionality Hold and Release will not be available for VP Securities and VP LUX eligible securities.

## Partial settlement

T2S will apply partial settlement when the delivering party does not have the full amount of securities or the receiving party does not have sufficient cash on the dedicated cash account (DCA) for settlement.

Customers' delivery and receipt instructions will continue to be provisioned for the full quantity and/or cash value before being released for settlement. Consequently, customer's delivery and receipt instructions may only settle partially if their counterparty is short of securities or cash.

Customers that do not wish their transactions to settle partially must provide field :22F::STCO//NPAR or Partial Settlement set to "Partial not allowed" in their instruction.

**VP Securities note:** VP Securities will not offer partial settlement and therefore it is not applicable to settlement in T2S with counterparties that access T2S via VP Securities in the interim period.

# Recycling rules

The following recycling rules will apply in T2S and will also be applicable to Clearstream Banking's links to Euroclear Belgium, Euroclear France, Euroclear Nederland, VP Securities and VP LUX:

- Unmatched instructions will be recycled for 20 business days (starting from the initial settlement date), after which they will be cancelled.
- Unmatched cancellation requests will be recycled for 20 business days (starting from the date of receipt).
- Matched instructions will have no cancellation limit and will be recycled until a business rule is violated (for example, security reaches maturity).

#### Cancellation

T2S will introduce the following cancellation rules which will also be applicable to Clearstream Banking's links to Euroclear Belgium, Euroclear France, Euroclear Nederland, VP Securities and VP LUX.

- Unmatched instructions: can be cancelled unilaterally by the party who placed the instruction at any time or until cancelled by T2S;
- Matched instructions: must be cancelled bilaterally by both counterparties.

For instructions that require bilateral cancellation, if the customer's counterparty sends a cancellation first, Clearstream Banking will report the status IPRC//CPRC or Processing – Cancellation Requested by your counterparty in CreationOnline on the customer settlement instruction.

If the customer sends the cancellation first, Clearstream Banking will report status/reason CPRC//CANP CANP//CONF on the cancellation request in SWIFT or Cancellation processing – Pending in CreationOnline.

### Market claims and transformations

In line with the Corporate Actions Joint Working Group (CAJWG), the Corporate Actions Subgroup (CASG) International Standards and the best market practices, market claims and transformations (together referred to Transaction Management) should be dealt automatically by the issuer CSDs in T2S, and will not require input from the customer. This has been confirmed for:

- Belgium / Euroclear Belgium
- France / Euroclear France
- Netherlands / Euroclear Nederland; and
- VP LUX

VP Securities note: Market claims and transformations will not be available in the interim period.

#### **Market Claims**

As a result, market claims (for both cash and securities where applicable) for instructions on securities eligible in Euroclear Belgium, Euroclear France, Euroclear Nederland, VP Securities and VP LUX will be detected and processed by the issuer CSDs and subsequently by the agent and/or the depository and Clearstream Banking. Once detected by the issuer CSDs after the close of business on record date and for the next 20 T2S business days, Clearstream Banking will report them to customers in the Market Claim Report with the relevant status of the market claim. In addition to the existing statuses, a new status "Partially compensated" will be available. Compensation credits/debits will be reported to customers via MT566 with indicator :22F::ADDB//CLAI.

The issuer CSDs apply trade date accounting for securities that are in units and settlement date accounting for securities that are in nominal.

Market claims in T2S will have their own lifecycle once matched (via Already Matched instructions) by the issuer CSD and will settle independently from the underlying settlement instruction. Although no action is required from customers, if the customer and its counterparty bilaterally cancel the underlying settlement instruction, the customer will need to agree directly with its counterparty about the reversal or the cancellation of the market claim.

**ESES (Euroclear Belgium, Euroclear France, Euroclear Nederland) note:** The market claims reversal process will not be delivered by ESES for the T2S migration date. We will inform customers as soon as a new implementation date is available.

#### **Transformations**

Similarly to the market claims process, transformation on securities eligible in Euroclear Belgium, Euroclear France, Euroclear Nederland and VP LUX will also be detected and processed by the issuer CSDs automatically in T2S after the close of business date on record date and for the next 20 T2S business days. Transformations are detected for matched and partially settled instructions only.

Transformations in T2S are processed in two technical steps (via Already Matched instructions): first, the cancellation of the underlying settlement instruction followed by the replacement by one or several new transformed settlement instructions.

Clearstream Banking will cancel and replace customers' pending settlement instructions based on feedback received from the market. Outturn in cash and securities will be posted to customers' accounts and reported in the MT950, MT9xx, MT54x and MT536 reports.

**ESES (Euroclear Belgium, Euroclear France, Euroclear Nederland) note:** The cancellation service will be delivered by ESES, but the functionality to create new instructions has been postponed until further notice. We will inform customers as soon as a new implementation date is available.

## Cum/ex indicator and opt out indicator

In line with the new T2S functionalities, unless otherwise specified, you are able to use the cum/ex indicator or opt out indicator on the original settlement instructions as follows (for example, if you do not wish the automatic compensation or transformation be applied by the issuer CSD and Clearstream Banking). Customers should note that the fields are additional matching fields, that is matching values must be provided by both counterparties. For further details on the indicators and services available, please refer to the section "Additional matching fields" above.

## **Buyer Protection**

In line with the CA market standards (CAJWG), the T2S CA standards do not impose issuer CSDs to implement buyer protection functionality. However if applied by the issuer CSD, it could be either:

- an automated buyer protection functionality in accordance with agreed market standards; or
- a manual buyer protection mechanism, via a bilateral agreement between the respective counterparties by means of a manual process (no intervention of the market infrastructure regarding the exchange of buyer protection instructions).

If the issuer CSD offers a buyer protection service, it will handle the execution of the buyer protection and take actions on the underlying transaction (Hold / cancellation / transformation).

**Note:** It has now been confirmed that for all Clearstream Banking T2S wave 3 links, no buyer protection services will be offered by the issuer CSDs and will therefore not be offered by Clearstream Banking.

## Further information

For further information, customers may contact Clearstream Banking Client Services or their Relationship Officer.

# **Instruction specifications**

In the following tables, M=Mandatory; O=Optional; C=Conditional

# Belgium - Euroclear Belgium eligible securities - Instruction specifications

## **Creation via SWIFT and CreationDirect**

|                                      | MT540   |  | Receive Free  | Seq     |                                 | MT541   |  | Receive Against Payment   |

a. Optional matching fields.b. Additional matching fields.

c. Only provide in order to prevent partial settlement. Euroclear Belgium only accepts indicators COEX/PARQ and COEX/PARC when instructing in ISO20022.

d. If a customer uses a BIC8, Clearstream Banking shall be entitled to modify the BIC8 by adding the default XXX suffix to comply with T2S settlement rules. Accordingly, such customers remain liable for any settlement fails that the use of the BIC8 may cause.

e. This optional matching field will be forwarded as received. T2S will only match if provided with format BIC or proprietary code. If a customer uses a BIC8, Clearstream Banking will add the default XXX suffix to comply with T2S settlement rules. If not present, Clearstream will default the customer's matching BIC for the instructing account (refer to Announcement A16033).

a. Optional matching fields.b. Additional matching fields.

c. Only provide in order to prevent partial settlement. Euroclear France only accepts indicators COEX/PARQ and COEX/PARC when instructing in ISO20022.

d. If a customer uses a BIC8, Clearstream Banking shall be entitled to modify the BIC8 by adding the default XXX suffix to comply with T2S settlement rules. Accordingly, such customers remain liable for any settlement fails that the use of the BIC8 may cause.

e. This optional matching field will be forwarded as received. T2S will only match if provided with format BIC or proprietary. If a customer uses a BIC8, Clearstream Banking will add the default XXX suffix to comply with T2S settlement rules. If not present, Clearstream will default the customer's matching BIC for the instructing account (refer to Announcement A16033).

a. Optional matching fields.b. Additional matching fields.

c. Only provide in order to prevent partial settlement. Euroclear Nederland only accepts indicators COEX/PARQ and COEX/PARC when instructing in ISO20022.

d. If a customer uses a BIC8, Clearstream Banking shall be entitled to modify the BIC8 by adding the default XXX suffix to comply with T2S settlement rules. Accordingly, such customers remain liable for any settlement fails that the use of the BIC8 may cause.

e. This optional matching field will be forwarded as received. T2S will only match if provided with format BIC or proprietary. If a customer uses a BIC8, Clearstream Banking will add the default XXX suffix to comply with T2S settlement rules. If not present, Clearstream will default the customer's matching BIC for the instructing account (refer to Announcement A16033).

a. Optional matching fields.

b. Additional matching fields.

c. Only provide in order to prevent partial settlement. VP LUX only accepts indicators COEX/PARQ and COEX/PARC when instructing in ISO20022.

d. If a customer uses a BIC8, Clearstream Banking shall be entitled to modify the BIC8 by adding the default XXX suffix to comply with

T2S settlement rules. Accordingly, such customers remain liable for any settlement fails that the use of the BIC8 may cause.
e. This optional matching field will be forwarded as received. T2S will only match if provided with format BIC or proprietary. If a customer uses a BIC8, Clearstream Banking will add the default XXX suffix to comply with T2S settlement rules. If not present, Clearstream will default the customer's matching BIC for the instructing account (refer to Announcement A16033).

## **CreationOnline**

Note: The Real Time Processing indicator "Optional" must not be used, or the instruction will be rejected in VP LUX.
