Message Functionality

Overview

The Meeting Instruction Cancellation message is sent to Clearstream by a client/account holder of Clearstream holding the right to vote, requesting Clearstream to cancel a previously submitted instruction.

Collection Description

This Usage Guideline includes the ISO 20022 message structures which are initially introduced by Clearstream for general meetings during the SCE Project in November 2024.

The focus in this section lies on messages which are sent between Clearstream and Clearstream clients (that is, account holders or their respective third-party service providers).

DISCLAIMER: Please note that these message structures have been created based on the current understanding. Not all discussions and testing procedures have been finalised. As such, the message structures are subject to change and have to be considered as a preliminary version.

Outline

The OneClearstream - General Meeting Messages (SR2024) - Clients / OneClearstream - Meeting Instruction Cancellation - SEEV.005 (SR2024) message is composed of 5 building blocks

MeetingInstructionIdentification

Identification of the original meeting instruction message for which the cancellation is requested or the original meeting instruction message containing the individual instruction(s) that is/are to be cancelled.

b. MeetingReference

Set of elements to allow the unambiguous identification of a meeting.

c. FinancialInstrumentIdentification

Security for which the meeting is organised.

d. ToBeCancelledInstruction

Specifies one or more instructions for which the cancellation is requested.

e. SupplementaryData

Additional information that cannot be captured in the structured fields and/or any other specific block.

3 Guidelines

1. Cancellation3Guideline

It is recommended that the request to cancel a meeting instruction with the use of MeetingInstructionIdentification only and that the optional elements are avoided, unless otherwise specified by market practice rules and or legislation. If any optional elements are included, they must be identical to the information in the meeting instruction message being cancelled.

4 Message Building Blocks

Note

The following chapter identifies the building blocks of the OneClearstream - General Meeting Messages (SR2024) - Clients / OneClearstream - Meeting Instruction Cancellation - SEEV.005 (SR2024) message definition.

4.1 MeetingInstructionIdentification

XML Tag: MtgInstrld

Presence: [1..1]

Definition: Identification of the original meeting instruction message for which the cancellation is requested or the original meeting instruction message containing the individual instruction(s) that is/are to be cancelled.

Datatype: "Max35Text" on page 62

4.2 MeetingReference

XML Tag: MtgRef

Presence: [1..1]

Definition: Set of elements to allow the unambiguous identification of a meeting.

The **MtgRef** block contains the following elements (see datatype "MeetingReference10" on page 19 for details)

Nandatory - R[x..x] Repeatability[details]
