T2S Party Hold Restriction

With this form, Clearstream Europe (CEU) clients and their service providers (CCPs, trading platforms or settlement agents with power of attorney) request CEU to set the "T2S Party Hold Restriction" in T2S¹ for instructions that the service provider generates on the CEU client's accounts. Subsequently, all these instructions are set up on hold so that the CEU client must release them before they can settle.²

¹ In T2S CRDM visible to DCPs with the relevant privileges assigned.

² This form must be presented after or along with the form "T2S Data Scope Extension" for Service Providers. In order not to allow the service provider to bypass the CEU client's release, the following service provider's T2S privileges for releasing instructions will be removed for the CEU client's account(s) mentioned here:

SIG_RPTYH (Release Party Hold Settlement Instruction) and for DCPs as well

SIG_RPTYA (Release Party Hold Auto-collateralisation Instruction).
