# 1. Introduction

## 1.1 Structure and intent of this document

This document focuses on the Unified for New Opportunities initiative of Clearstream and more specifically on the second activation wave in June 2026. The document follows the same principles as Wave 1 document and will explain the changes for the markets in Wave 2 scope.

This document only focuses on the changes which come with the Switzerland, United States of America (U.S.) and Canadian markets activation in wave 2 in June 2026.

Chapter 1 is explaining beside the general structure of the document the activation principles for the ISINs in scope and the change in the service offering that the switch to OneClearstream Service level brings for the markets Switzerland ,U.S. and Canada

Chapter 2 summarises the key aspects of the activation of the markets Switzerland, U.S. and Canada. It explains the impact for the different Clearstream products resulting out of the specific market activation. Please be aware that similar to the first activation wave not every product will be impacted by the second market activation wave. Nevertheless, each product has a dedicated chapter which may contain only the statement that there is no impact within this specific market activation wave on the respective product.

## 1.2 Activation principles

With the activation of the markets Switzerland, United States of America (U.S.) and Canada T2S settlement will be enabled for securities issued in these markets.

Clearstream will publish an excel list on the [Unified for New Opportunities rollout documentation](#) web page with all ISINs in scope of the market activation four weeks before the market activation date. The activation principles and published fields will follow the same principles as they are described in [Unified for New Opportunities Detailed Functional Specifications](#) for Norway and Australia section 1.2.

Please be aware that both, ISINs currently held in CSC and ISINs held in NCSC are in scope of migration wave 2 and will be updated to NCSC-T.

Further there are specificities that need to be reflected for this activation wave. The CEU direct link to the depositories (SIX SIS and DTCC) will be deactivated.

- ISINs that are currently processed via the CEU direct link to SIX SIS will be processed via CEU-CBL-SIX-SIS flow or via CEU-CBL-UBS- SIX-SIS flow.
- ISINs that are currently processed via the CEU direct link to DTCC will be processed via CEU-CBL-Citibank-DTCC flow.
- ISINs that are currently processed via the CEU direct link to DTCC will be processed via CEU-CBL-RBC-CDS flow.

During the change of the link, all pending transactions on CEU accounts will be cancelled.

- Domestic transactions in the former link: Clients/CCPs will need to reinstruct cancelled transactions:

- Intra-CSD (CEU-CEU) transactions will be cancelled for the ISINs in scope during the change of links.

Non cleared German stock exchange transactions: Clearstream will reinstruct German stock exchange transactions cancelled during the process. These new instructions shall be re-submitted to T2S after the new security CSD links are created, with a new T2S actor reference (2nd digit to be increased) and a new "Auftragsnummer" this means if

- Original reference always starts with SAxxxxxxx
- Re-instructed reference always starts with SBxxxxxxx
- And in case we re-instruct another time with SCxxxxxxx.

Note that no linking will be applied to re-instructed SE trades, i.e. linkages will not be restored.

- OTC transactions (except Eurex Clearing AG cleared transactions): Clients will need to reinstruct the cancelled pending transactions.
- Eurex Clearing AG intends to reinstruct all of its cancelled pending cleared transactions.

The timing of these cancellations will vary depending on the intended settlement dates of the respective instructions specifically, whether they fall before, on, and after 29/05/2026, which marks the first activation date of the new links.

Instruction on the 6-series accounts will not be cancelled and will fully settle on the 6-series.

Furthermore, the Asset Services processing will switch from KADI to OneCAS for CEU clients on 1 CAS activation date being the Friday before the migration weekend and will be processed by

The following functionalities will be impacted as part of OneCAS migration:

1. Announcement Capture and Event Creation
2. Payments
3. Decision Management
4. Reversal and Repayment
5. Transaction Management
6. Tax Management
7. Main Paying Agent Reporting

With the implementation of the OneClearstream service offering, Asset Services processing is undergoing modernisation, harmonisation, and standardisation — all aimed at enhancing operational efficiency and client experience.

To support this transformation, OneCAS has been established, focusing on the following key aspects:

- Modernising the infrastructure;
- Achieving functional simplification and harmonisation through the consolidation of processing environments;
- Minimising the complexity of operating dual asset servicing processes across different technical platforms (KADI vs. Custody).

The corporate action (CA) income events ongoing on the current links will be processed as follows:

- CA events with an entitlement date on or after the OneCAS activation date will be cancelled in KADI and CEU clients will be considered for the processing in OneCAS

- CA events with an entitlement date before the OneCAS activation date will be completed in KADI
- Two-scenario events (events with interim securities): The second event will be processed in KADI if the first event is completed in KADI.

As from 1 CAS activation the CEU client will benefit from the full General Meeting service level for Switzerland. The service level for U.S. and Canada the General Meeting service level will remain.

For further information please refer to [Client Handbook For clients of Clearstream Europe AG using the OneClearstream service](#).

Payments resulting from CA will follow the same principles that are described in [Unified for New Opportunities Detailed Functional Specifications](#) in section 1.2.

## 2. Detailed Functional Specifications

### 2.1 Activation of the Swiss market

This chapter outlines the changes that the activation of the Swiss market will bring for CEU clients. Please note that the service level for the Investment funds eligible for Vestima order routing (Vestima Funds) differs slightly from the service level applied to other instruments issued in the Swiss market due to different links at CBL side.

Therefore:

- Sections 2.1.1 and 2.1.3 describe the general service level applicable to instruments in the Swiss market.
- Sections 2.1.2 and 2.1.4 outline the specific service level for Vestima funds held via UBS.

#### 2.1.1 Settlement

##### **Intra-CSD settlement**

For intra-CSD settlement (CEU-CEU) of Swiss securities in EUR Clients will benefit from the full range of T2S settlement services (for example, partial settlement, hold and release) like any other T2S securities. Also, the existing T2S settlement timelines will apply.

Cash in EUR will settle in Central Bank Money (CeBM) via DCA account and cash in non-EUR will settle in Commercial Bank Money (CoBM) via 6-series accounts until final UNO-final migration or via CBL accounts afterwards. Please be aware that partial settlement is not available for both delivery and receipt in non-EUR currency.

##### **Cross-CSD settlement**

Cross-CSD settlement is possible with no limitations (FOP and A/P) between a CEU participant and a participant of other T2S-CSDs that are using the same technical issuer CSD for the securities. Clearstream is working in enabling other T2S-CSDs to appoint CEU as technical Issuer CSD for all securities in the scope of this initiative. However, this functionality is not yet available for all securities in scope.

##### **External-CSD settlement**

External settlement with CBL counterparty

External-CSD settlement (CEU-CBL) for Swiss securities will follow the already applicable standards for ISINs active on the CEU-CBL link. Also, the instructions will follow the same logic as the ISINs already activated on the CEU-CBL link. For instruction examples please refer to the Appendix of [Unified for New Opportunities Detailed Functional Specifications](#) where the instructions are explained for the different connectivity channels. For further information, please refer to the [Market Link Guide - International \(CEU\)](#).

External settlement with EB (Euroclear Bank) counterparty

External-CSD settlement (CEU-CBL-EB) for Swiss securities will follow the already applicable standards for ISINs active on the CEU-CBL-EB link. Also, the instructions will follow the same logic as the ISINs already activated on CEU-CBL-EB link. For instruction examples please refer to the Appendix of [Unified for New Opportunities Detailed Functional Specifications](#) where the instructions are explained for the different connectivity channels. For further information, please refer to the [Market Link Guide - Bridge](#).

External-CSD settlement with a domestic Swiss counterparty

The current Clearstream CEU **direct link** to SIX-SIS will be decommissioned. External-CSD settlement with domestic counterparties in Swiss via enhanced CEU-CBL-domestic link will be available with the activation of the Swiss market in June 2026.

The following table compares the As-Is functionalities on 6-series accounts, the AS-Is functionalities on CEU accounts for Swiss securities that are already T2S eligible with the To-Be functionalities on CEU accounts for external CSD settlement for Swiss securities with a domestic Swiss counterparty. For instruction examples, please refer to Appendix.

Service	As-Is on 6-series account	As-Is on CEU	To-Be on CEU with domestic counterparty
Settlement – Free of Payment and Versus Payment	FOP and Versus Payment settlement is supported for 6-series account clients for CH Market.  Eligible settlement currency for Swiss: Swiss Franc (CHF), British Pound (GBP), United States Dollar (USD) and Euro (EUR).	FOP and Versus Payment settlement is supported for CEU clients for the CH market.  Eligible settlement currency for the Swiss market: Swiss Franc (CHF CeBM)	FOP and Versus Payment settlement will be supported for CEU clients for the CH market.  Eligible settlement currency for the CH market: Swiss Franc (CHF CoBM), British Pound (GBP), United States Dollar (USD). Please note that (EUR) will not be an eligible settlement currency. Please be aware that the settlement in CHF will be processed in CoBM via a 6-series account and not as today in CeBM via the SNB anymore. Therefore, we recommend to ensure sufficient funding of the 6-series account in CHF.
Hold and Release	When the instruction is sent to the domestic market, the client cannot put it back on hold.	Not offered	When the instruction is sent to the domestic market, the client cannot put it back on hold

Immediate Release	Immediate Release mechanism is supported for 6-series account clients.	Immediate release is not compatible with T2S (therefore it is not offered)	Immediate release is not compatible with T2S (therefore it will not be offered)
Partial Settlement	Partial settlement is not offered by SECOM.	Not offered	Partial settlement will not be supported for CEU accounts via the CEU-CBL link for instructions with Domestic Swiss counterparties for both delivery and receipt instructions.
Cash Penalty	Cash penalties are not applicable on the Swiss domestic market.	Cash penalties are not applicable on the Swiss domestic market.	Cash penalties are not applicable on the Swiss domestic market.
Back-to-back	Back-to-back is currently supported for 6-series account clients.	Back-to-back is currently not offered to CEU clients.	Back-to-back cannot be offered to CEU clients.
Multi-markets Securities	Clients can reach additional counterparties outside of Swiss via remote codes.	Not offered	Not offered in CEU/T2S.
Allegements	Clients can receive allegements from domestic counterparties.	Not offered	Clients, using OneClearstream connectivity can receive allegements from domestic counterparties with the activation from the November 2026 release.
Registration service	Offered	Not offered	Offered

## 2.1.2 Settlement of mutual funds processed via UBS

The settlement of Vestima funds held via UBS will follow the same service level as other instruments issued in the Swiss market for

- Intra CSD settlement;
- Cross CSD settlement;
- External settlement via transfer agent with CBL and domestic counterparties.

Please be aware that external settlement via transfer agent of these funds with counterparties in EB will not be supported. Further against payment settlement in CHF for these instruments takes place on the cash account of UBS at the Swiss National Bank (in Central Bank Money).

## 2.1.3 Asset Servicing

In the following section, the As-Is situation for 6-series accounts, As-Is on CEU (Direct Link) accounts, and the To-Be situation on CEU accounts for Swiss domestic securities are compared to highlight the differences in available services. Please note that there will be a change in the As-Is processing due to a CBL link update in February 2026. Consequently, the service level for the As-Is situation on 6-series accounts will be slightly different at the time of market activation in June 2026. We will link the related information regarding the link change as soon as it is available.

Please note that there is no difference between OTC and stock exchange (cleared and non-cleared) business for Swiss in terms of corporate action handling.

### Corporate Actions Services

#### Corporate Action notification / entitlement forecast

The standard OneClearstream process for corporate action notification and entitlement forecast applies.

COAF is reported by the market.

#### Decision management

The standard OneClearstream process applies. Clients may instruct on voluntary and mandatory with choice events using the following media:

- Xact Web Portal;
- Xact File Transfer;
- Xact Swift

Please be aware that instructions via email and fax will not be accepted anymore.

#### Payment management/reversals

Standard OneClearstream service level applies.

#### Market claims and reverse market claims

<b>Standalone Permanent Registrations / De-Registrations</b>	Yes

### 2.1.4 Asset Servicing of mutual funds processed via UBS

In the following chapter, the asset servicing process for Vestima funds held via UBS is explained. As in the settlement section, Clearstream will only highlight the differences in the service offering compared to other instruments.

## Corporate Actions Services

### Market claims and reverse market claims

- For market claims and reverse market claims the eligible transactions for detection and compensation are all instructions as of status matched. There are no further limitations.
- The Opt-out and the Ex-indicator are not supported.

### Transformations

- Same as for market claims transactions are all instructions as of status matched. There are no further limitations.

## General Meeting Service

Please be aware that temporary registration/de-registration for GM is not applicable for Vestima funds held via UBS.

### 2.1.5 Tax

For further guidance on the eligibility to tax relief and applicable certification process, please refer to Announcement (Tax announcement) and the [Market Taxation Guide - Switzerland](#). Please note that the tax process for Switzerland is the same for both CBL and CEU.

### 2.1.6 Investment Funds

#### Scope of activation

All investment funds ISIN codes - including Exchange-Traded Funds (ETFs) - that are in scope of this activation (the "Securities") will be published on the [Unified for New Opportunities rollout documentation](#) web page.

This activation wave covers:

- Domestically-issued securities

All ISINs within the defined scope will be made **eligible for settlement in T2S**, provided such eligibility has not already been established.

#### Order routing services details

For securities requiring order routing via Vestima:

- Order routing services must continue via 6-series accounts until December 2026.
- Only after this date, Vestima will support order routing services for CEU accounts.

Clients will have the opportunity to realign positions to their CEU accounts at any point following market activation.

#### Market overview

Switzerland is classified as:

- A CSD/Domestic market;
- A register market for investment fund securities.

**Note:** The **Register Market is not in scope** for this activation.

### Processing flows

#### Vestima Funds via UBS:

- Clearstream Europe (CEU) maintains an indirect link with UBS AG for domestic funds eligible for Vestima order routing.
- Securities eligible for order routing (Fund Processing Group = Vestima) will be processed via the following flow: CEU → CBL → UBS

#### No Order Routing Funds via SIX SIS:

- Clearstream is establishing a direct link with SIX SIS via Clearstream Banking Luxembourg (CBL).
- This flow supports funds not eligible for order routing (Fund Processing Group = No Order Routing).
- Securities not eligible for Vestima order routing will be processed via the following flow: CEU → CBL → SIX SIS.

### Important Notes:

- Some funds may impose restrictions on investor domicile.
- Clients must consult the fund prospectus and comply with any such restrictions before trading.
- Further details and market specifics are available on the Clearstream website.

## 2.1.7 Collateral management

There will be no changes in collateral management programs on CmaX for the activation of Swiss market in June 2026.

Further descriptions on impacts for collateral management will be described in the generic document which will be published soon.

## 2.1.8 Lending

There will be no changes to the lending programs related to the activation of the Swiss market in June 2026.

# 2.2 Activation of the U.S. market

In the following chapter the changes that the activation of the U.S. market will bring to the CEU clients will be explained for all Clearstream products that are impacted by the overall initiative.

Please be aware the DTC Investor link in CEU – 7211 (DTC account 6200), used for ISINs whereas CEU is the Issuer CSD (German securities) remains unchanged.

## 2.2.1 Settlement

### Intra-CSD settlement

For intra-CSD settlement (CEU-CEU) of U.S. securities in EUR CEU clients will benefit from the full range of T2S settlement services (for example, partial settlement, hold and release) like any other T2S securities. Also, the existing T2S settlement timelines will apply.

Cash in EUR will settle in CeBM money (DCAs) and cash in non-EUR will settle in CoBM Creation accounts.

### Cross-CSD settlement

Cross-CSD settlement is possible with no limitations (FOP and A/P) between a CEU participant and a participant of other T2S-CSDs that are using the same technical issuer CSD for the securities. Clearstream is working in enabling other T2S-CSDs to appoint CEU as technical Issuer CSD for all securities in the scope of this initiative. However, this functionality is not yet available for all securities in scope

### External-CSD settlement

#### External settlement with CBL counterparty

External-CSD settlement (CEU-CBL) of U.S. securities will follow the already applicable standards for ISINs active on the CEU-CBL link. Also, the instructions will follow the same logic as the ISINs already activated on the CEU-CBL link. For instruction examples please refer to the Appendix of [Unified for New Opportunities Detailed Functional Specifications](#) where the instructions are explained for the different connectivity channels. For further information, please refer to the [Market Link Guide - International \(CEU\)](#).

#### External settlement with EB (Euroclear Bank) counterparty

External-CSD settlement (CEU-CBL-EB) for U.S. securities will follow the already applicable standards for ISINs active on the CEU-CBL-EB link. Also, the instructions will follow the same logic as the ISINs already activated on the CEU-CBL-EB link. For instruction examples please refer to the Appendix of [Unified for New Opportunities Detailed Functional Specifications](#) where the instructions are explained for the different connectivity channels. For further information, please refer to the [Market Link Guide - Bridge](#).

#### External-CSD settlement with a domestic U.S. counterparty

The current Clearstream CEU **direct link** to DTCC will be decommissioned. External-CSD settlement with a domestic counterparty in the U.S. will be enhanced with the activation of the U.S. market in June 2026.

After the market activation the settlement of Canadian securities via DTCC will only be possible for free of payment transactions and not for versus payment transactions.

In the following table the As-Is functionalities on 6-series accounts, the As-Is functionalities on CEU accounts and To-Be functionalities on CEU accounts for external CSD settlement for U.S. securities with a domestic U.S. counterparty are described. For example instructions, please refer to Appendix.

Please note that instructions for ISINs activated for the U.S. market will be rejected if the face amount exceeds USD 50 million. Further the processing of the Value date (:98A::VALU// ) in MT545/547 will only be possible with the activation of the June release planned for 15<sup>th</sup> June 2026 for clients using OneClearstream connectivity.

#### Processing of DK (Don't Know)

Receipts in CEU (specific, for free of payment only): Same as on CBL side receipts free of payment in CEU from a U.S. counterparty require a receipt instruction from our client. No DK (Don't Know) will be initiated by CEU on its behalf, bearing in mind that the delivery could be DK'ed in turn by the U.S. counterparty in the absence of appropriate communication between said counterparty and our client.

Deliveries from CEU and risk of DK: Local market practice allows the receiving party to reverse a receipt (under the "Don't Know" - DK - procedure). If this happens, the securities are re-credited (and any sales proceeds are re-debited value settlement date) for same-day DKs on SD+1 and for later DKs as soon as the reversal has been processed. The reason of the DK is passed on from the counterparty to the client in field :70D: of MT548 and MT537. The quality of the DK information depends on what the U.S. counterparty has input in its DK DTC ticket.

The risk of DK is limited to transactions that are not subject to RAD approval in DTC. Transactions that are subject to RAD approval are as follows:

- All against payment deliveries of DTC-eligible securities where the countervalue is greater than USD 0.01;
- Free of payment deliveries of DTC-eligible MMIs.

To avoid DK (Don't Know) settlement failures, counterparties receiving securities from a CEU client must instruct their U.S. or Canadian custodian by its agreed deadline to accept securities delivered by CEU's depository Citibank via FBE, DTC, CDS as appropriate.

#### Restriction regarding Low-Priced Securities

The restriction regarding Low-Priced Securities implemented by the local agent Citi to enhance risk-mitigation measures by blocking new holdings and rejecting incoming Low-Priced Securities transactions, will also apply for the future CEU settlement process. Further information to be found here: [U.S.A.: Low Priced Securities – Enhancement of risk mitigation and settlement measures](#)

<b>Service</b>	<b>As-Is on 6-series account</b>	<b>As-Is on CEU</b>	<b>To-Be on CEU with Domestic Counterparty</b>
<b>Settlement – Free of Payment and Versus Payment</b>	FOP and versus Payment settlement is supported for 6-series account clients for the U.S. market. Eligible settlement currency for U.S.: United States Dollar (USD)	FOP is supported and Versus Payment not supported for CEU clients for U.S. Market.	FOP and Versus Payment settlement will be supported for CEU clients for the U.S market. Eligible settlement currency for U.S.: United States Dollar (USD)
<b>Hold and Release</b>	When the instruction is sent to the domestic market, the client cannot put it back on hold	Not Offered	When the instruction is sent to the domestic market, the client cannot put it back on hold
<b>Immediate Release</b>	Immediate Release mechanism is not supported for 6-series account clients.	Immediate Release mechanism is not supported for CEU account clients	Immediate release is not compatible with T2S (therefore it will not be offered).
<b>Partial Settlement</b>	Partial settlement is not offered to 6-series account clients on domestic receipt instructions, not on domestic delivery instructions.	Not Offered	Partial settlement will not be supported for CEU accounts via the CEU-CBL link for instructions with Domestic U.S. counterparties for both delivery and receipt instructions
<b>Cash Penalty</b>	Cash penalties are not applicable on the U.S. domestic market.	Cash penalties are not applicable on the U.S. domestic market	Cash penalties are not applicable on the U.S. domestic market
<b>Back-to-back</b>	Back-to-back is currently supported for 6-series account clients.	Back-to-back cannot be offered to CEU clients	Back-to-back cannot be offered to CEU clients.
<b>Multi-Market Securities</b>	Client can reach additional counterparties via remote codes	Not offered in CEU/T2S.	Not offered in CEU/T2S.
<b>Allegements</b>	Client can receive allegements from domestic counterparties	Clients can currently not receive allegements from domestic counterparties	Clients that are using one Clearstream connectivity can receive allegements from domestic counterparties with the activation from the November 2026 release.

## 2.2.2 Asset Servicing

In the following section the As-Is situation on 6-series accounts and CEU accounts and To-Be situation on CEU accounts for U.S. securities are compared to highlight the differences in available services.

Please note that the Transaction Management rules described below apply to all transactions except for those cleared by Eurex Clearing AG. For transactions cleared by Eurex Clearing AG, the "Eligible transactions Compensation" is "All as of status matched", and the "Reinstruction" for transformations is "Yes".

### Corporate Actions Services

#### **Corporate Action notification / entitlement forecast**

The standard OneClearstream process for corporate action notification and entitlement forecast applies.

Please note that COAF is reported as provided by the market.

#### **Decision management**

The standard OneClearstream process for client instructions during corporate action events applies.

#### **Payment management/reversals**

The standard OneClearstream process applies.

#### **Market claims and reverse market claims**

<b>Process</b>	<b>Applicability</b>

<b>Clearstream Service</b>	Yes	Yes	Yes
<b>ISS Enhanced Service</b>	Yes	No	No

### Shareholders Identification Disclosure services (SID)

Not applicable.

### Miscellaneous services

	To-Be CEU
<b>German ADRs</b>	Applicable for specifics please refer to the tax section 2.2.3.
<b>Sale and purchase of rights</b>	Not applicable
<b>Markdown service</b>	Applicable <a href="#">Markdown service</a>
<b>Auto FX Service</b>	Yes (CBL accounts only, for 6-series accounts until final migration)

## 2.2.3 Tax

For further guidance on the eligibility to tax relief and applicable certification process, please refer to Announcement ([Tax announcement D25026](#) and the Market Taxation Guide - U.S.A). Please note that the tax process for U.S.A is the same for both CBL and CEU.

Harmonised process will be implemented leveraging the current CEU solution to process ADRs, representing shares of German companies (German ADRs) as soon as they are transferred to a CEU account. For the processing of German ADRs will publish in a dedicated tax announcement soon.

## 2.2.4 Investment funds

### **Scope of activation**

All investment funds ISIN codes - including Exchange-Traded Funds (ETFs) - that are in scope of this activation (the "Securities") will be published on the [Unified for New Opportunities rollout documentation](#) web page .

This activation wave covers:

- Domestically issued Securities

All ISINs within the defined scope will be made **eligible for settlement in T2S**, provided such eligibility has not already been established.

### **Order routing services details**

For Securities requiring order routing via Vestima:

- Order routing services must continue via 6-series accounts until December 2026
- Only after this date, Vestima will support order routing services for CEU accounts

Clients will have the opportunity to realign positions to their CEU accounts at any point following market activation.

### **Important Notes**

- Some funds may impose restrictions on investor domicile.
- Clients must consult the fund prospectus and comply with any such restrictions before trading.
- Further details and market specifics are available on the Clearstream website.

## 2.2.5 Collateral management

There will be no changes in collateral management programs on CmaX (no other Collateral programs impacted by this initiative) for the activation of the U.S. market in June 2026.

Further descriptions on impacts for collateral management will be described in the generic document which will be published soon.

## 2.2.6 Lending

There will be no changes in lending programs for the activation of the U.S. market in June 2026.

## 2.3 Activation of the Canadian market

In the following chapter the changes that the activation of the market Canada will bring to the CEU clients will be explained for all Clearstream products that are impacted by the overall initiative. Please be aware that the Canadian securities currently processed via the CEU direct link to DTCC will follow the same service level and the presented settlement functionalities as the U.S. securities on this link. Therefore, the current service level for CEU is not explicitly mentioned. Because there are some differences in the service level in the asset servicing, the current As-Is situation on CEU accounts is mentioned in this chapter.

### 2.3.1 Settlement

#### **Intra-CSD settlement**

Intra-CSD settlement (CEU-CEU) of Canadian securities in EUR will benefit from range of T2S settlement services (for example, partial settlement, hold and release) like any other T2S securities. Also, the existing T2S settlement timelines will apply.

Cash in EUR will settle in CeBM money (DCAs) and cash in non-EUR will settle in CoBM on the ICSD accounts.

Partial settlement is not available for both delivery and receipt in non-EUR currency.

#### **Cross-CSD settlement**

Cross-CSD settlement is possible with no limitations (FOP and A/P) between a CEU participant and a participant of other T2S-CSDs that are using the same technical issuer CSD for the securities. Clearstream is working in enabling other T2S-CSDs to appoint CEU as technical Issuer CSD for all securities in the scope of this initiative. However, this functionality is not yet available for all securities in scope

#### **External-CSD settlement**

##### External settlement with CBL counterparty

External-CSD settlement (CEU-CBL) for Canadian securities will follow the already applicable standards for ISINs active on the CEU-CBL link. Also, the instructions will follow the same logic as the ISINs already activated on the CEU-CBL link. For instruction examples please refer to the Appendix of [Unified for New Opportunities Detailed Functional Specifications](#) where the instructions are explained for the different connectivity channels. For further information, please refer to the [Market Link Guide - International \(CEU\)](#).

##### External settlement with EB (Euroclear Bank) counterparty

External-CSD settlement (CEU-CBL-EB) for Canadian securities will follow the already applicable standards for ISINs active on the CEU-CBL-EB link. Also, the instructions will follow the same logic as the ISINs already activated on the CEU-CBL-EB link. For instruction examples please refer to the Appendix of [Unified for New Opportunities Detailed Functional Specifications](#) where the instructions are explained for the different connectivity channels. For further information, please refer to the [Market Link Guide - Bridge](#)

##### External-CSD settlement with a domestic Canadian counterparty

External-CSD settlement with a domestic Canadian counterparty via enhanced CEU-CBL-Domestic link will be available with the activation of the Canadian market in June 2026. The processing of the Value date (:98A::VALU// ) in MT545/547 will only be possible with the activation of the June release planned for 15<sup>th</sup> June 2026 for clients using OneClearstream connectivity.

In the following table compares the As-Is functionalities on 6-series accounts and To-Be functionalities on CEU accounts for external CSD settlement for Canadian securities with a domestic Canada counterparty. For instruction examples, please refer to Appendix "Instruction example".

Service	As-Is on 6-series	To-Be on CEU with domestic counterparty
<b>Settlement – Free of Payment and Versus Payment.</b>	<p>FOP and versus payment settlement are supported for 6-series clients.</p> <p>Eligible settlement currency for Canada: Canadian Dollars (CAD) and U.S. Dollars (USD) with Canadian counterparties in CDS</p>	<p>FOP and versus payment settlement are supported for CEU clients.</p> <p>Eligible settlement currency for Canada: Canadian Dollars (CAD) and U.S. Dollars (USD) with Canadian counterparties in CDS</p>
<b>Hold and Release</b>	<p>When the instruction is sent to the domestic market, the client cannot put it back on hold</p>	<p>When the instruction is sent to the domestic market, the client cannot put it back on hold.</p>
<b>Immediate Release</b>	<p>Immediate Release mechanism is supported for 6-series account clients (for some instruments only)</p>	<p>Immediate release is not compatible with T2S (therefore it will not be offered)</p>
<b>Partial Settlement</b>	<p>Partial settlement is not offered to 6-series account clients on domestic receipt instructions, not on domestic delivery instructions.</p>	<p>Partial settlement will not be supported for instructions with domestic Canadian counterparties for both delivery and receipt instructions.</p>
<b>Cash Penalty</b>	<p>Cash penalties are not applicable on the Canadian domestic market.</p>	<p>Cash penalties are not applicable on the Canadian domestic market.</p>
<b>Back-to-back</b>	<p>Back-to-back is currently supported for 6-series account clients.</p>	<p>Back-to-back cannot be offered to CEU clients.</p>
<b>Multi-deposited Securities</b>	<p>Client can reach additional counterparties via remote codes.</p>	<p>Not offered in CEU/T2S .</p>
<b>Allegements</b>	<p>Client can receive allegements from domestic counterparties.</p>	<p>Clients, that are using one Clearstream connectivity can receive allegements from domestic counterparties with the activation from the November 2026 release.</p>

## 2.3.2 Asset Servicing

In the following section the As-Is situation on 6-series accounts and To-Be situation on CEU accounts for Canadian securities are compared to highlight the differences in available services. Please note that the Transaction Management rules described below apply to all transactions except for those cleared by Eurex Clearing AG. For transactions cleared by Eurex Clearing AG, the “Eligible transactions Compensation” is “All as of status matched”.

### Corporate Action Services

#### **Corporate Action notification / entitlement forecast**

The standard OneClearstream process for corporate action notification and entitlement forecast applies.

Please note that COAF is not reported as not provided by the market.

CA Notification for multi-listed securities is offered for CEU clients: Only home codes on CEU, home and remote on CBL.

#### **Decision management**

The standard OneClearstream process for client instructions during corporate action events applies.

Clients may instruct on voluntary and mandatory with choice events using the following media:

- Xact Web Portal;
- Xact File Transfer1;
- Xact Swift

Please be aware that instructions via Email and Fax will not be accepted anymore.

#### **Payment management/reversals**

The standard OneClearstream process applies.

#### **Market claims and reverse market claims**

<b>Process</b>	<b>Applicability</b>

<b>Auto FX Service</b>	Yes (CBL accounts only, for 6-series accounts until final migration)

## 2.3.3 Tax

For further guidance on the eligibility to tax relief and applicable certification process, please refer to Announcement [D26004 \(Unified for New Opportunities - Canada - New tax service for Clearstream Europe AG clients\)](#) and the [Market Taxation Guide - Canada](#). Please note that the tax process for Canada is the same for both CBL and CEU.

## 2.3.4 Investment funds

### Scope of activation

All investment funds ISIN codes - including Exchange-Traded Funds (ETFs) - that are in scope of this activation (the "Securities") will be published on the [Unified for New Opportunities rollout documentation](#) web page.

This activation wave covers:

- Domestically-issued securities

All ISINs within the defined scope will be made **eligible for settlement in T2S**, provided such eligibility has not already been established.

#### **Order routing services details**

For Securities requiring order routing via Vestima:

- Order routing services must continue via 6-series accounts until December 2026
- Only after this date, Vestima will support order routing services for CEU accounts

Clients will have the opportunity to realign positions to their CEU accounts at any point following market activation.

#### **Important Notes**

- Some funds may impose restrictions on investor domicile.
- Clients must consult the fund prospectus and comply with any such restrictions before trading.
- Further details and market specifics are available on the Clearstream website.

### 2.3.5 Collateral management

There will be no changes in collateral management programs on CmaX (no other Collateral programs impacted by this initiative) for the activation of the Canadian market in June 2026.

Further descriptions on impacts for collateral management will be described in the generic document which will be published soon.

### 2.3.6 Lending

There will be no changes to the lending programs related to the activation of the Canadian market in June 2026.

# Glossary

<b>Acronym or abbreviation</b>	<b>Description</b>
<b>OneCAS</b>	OneClearstream Asset Servicing: Program to provide a harmonised environment for corporate action processing, in compliance with all the new European standards.
<b>6-series</b>	6-series account of Clearstream Europe AG
<b>CEU - CBL Link</b>	Settlement via the CEU omnibus 18757
<b>CeBM</b>	Central Bank Money
<b>COAF</b>	Corporate Action Event Reference
<b>CoBM</b>	Commercial Bank Money
<b>CoSD</b>	Conditional Securities Delivery (COSD): T2S logic that support settlement with the external platform
<b>Creation</b>	Settlement system of CBL
<b>Cross-CSD settlement</b>	CEU versus other T2S CSDs counterparties
<b>DCP clients</b>	Direct connected clients (T2S)
<b>DOM</b>	Domestic
<b>EB</b>	Euroclear Bank
<b>External-CSD settlement</b>	CEU versus counterparties in CBL, in EB, on the local market (outside of T2S)
<b>FOP</b>	Free of payment
<b>ICP client</b>	Indirect connected participant (T2S)
<b>ICSDs</b>	international central securities depository
<b>Intra-CSD settlement</b>	Settlement between two clients of the same CSD (CEU vs CEU or LuxCSD vs LuxCSD)
<b>N/A</b>	Not applicable
<b>UCSA service</b>	Underlying Customer Segregated Account Identifier (UCSA) service
<b>SECOM</b>	SECOM is a securities settlement system operated by SIX SIS AG

**Acronym or abbreviation****Description****SSI**

Standard Settlement Instruction

**Vestima**

Order Routing platform to provide a gateway to global funds solutions ranging from order routing, centralised delivery versus payment (DVP) settlement, safekeeping and asset servicing to collateral management.

# Appendix

## Instruction example

The following examples show the instruction formats for Domestic United States, Canada and Swiss, with the example MT542 (client) against MT540 (counterparty).

Regarding the usage of the common reference please note the following:

For instructions against domestic counterparties, the use of the common reference is optional but recommended, depending on the logic of the local market. The logic that currently applies to 6-series will also apply to CEU accounts.

To ensure smooth settlement and re-alignment process between CEU and CBL, for all markets in scope of project Unified for New Opportunities (UNO), please refer to the following guides for the required format to transfer holdings from 6-series/CBL to your CEU accounts:

- [Instruction specifications - Transfer of securities between CBL and CBF counterparties - Xact via SWIFT and Xact File Transfer - International \(CBL\)](#)
- [Instruction specifications - International \(Counterparty in CBL\) \(CEU\)](#)

The tables are sorted the following:

- A. Client instruction, ordered by the connectivity channel:
  - a) CASCADE via Swift Delivery;
  - b) CASCADE via Swift Receive;
  - c) Xact via Swift Delivery;
  - d) Xact via Swift Receive;
  - e) T2S DCP Delivery;
  - f) T2S DCP Receive;
  - g) CASCADE Online Delivery;
  - h) Xact via Swift Delivery.
- B. Counterparty instructions with UCSA service identifier subscribed.
- C. Counterparty instructions without UCSA service identifier subscribed;

When having subscribed to the UCSA service, the SSIs differ based on whether or not the UCSA account should be used or not. This can be indicated by using the identifier SETR//803.

Please be aware that the reference mandatory/optional refers to the provided information in the example and does not relate to the qualifier.

Depending on how many parties the client wants to use in their instructions, the usage of the identifier will follow the following logic.

- o PSET ==> REAG
- o PSET ==> REAG ==> BUYR
- o PSET ==> REAG ==> RECU ==> BUYR

- o PSET ==> REAG ==> REI1 ==> RECU ==> BUYR
- o PSET ==> REAG ==> REI2 ==> REI1 ==> RECU ==> BUYR for One Clearstream connectivity
- o PSET ==> REAG ==> REI1 ==> REI2 ==> RECU ==> BUYR for CASCADE via Swift connectivity

## A. Client instruction

### a. CASCADE via Swift Delivery

- a. The Common Reference may be populated based on market practices and in coordination with local counterparties.
- b. 97A must be populated together with 95P for REI1, it must be populated with DTC ID code of the counterparty. Counterparty's BIC will not be forwarded to the depository. Only the DTC ID will be forwarded to the depository (:95R::REAG/DTCYID/DTC id code)  
Important: The DTC code must be provided without DSS DTCYID, that is, the client must input 97A::SAFE//xxxx and NOT 97A::SAFE/DTCYID/xxxx.
- c. Many U.S. counterparties request beneficiary account details and, to avoid settlement failure, clients are strongly urged to provide them.
- d. 97A must be populated together with 95P for REI1, it must be populated with ABA number of the counterparty. Counterparty's BIC will not be forwarded to the depository. Only the ABA number will be forwarded to the depository (:95R::REAG/USFW/counterparty's ABA number)  
Important: The Fedwire code must be provided without DSS USFW, that is, the client must input 97A::SAFE//xxxxxxxx and NOT 97A::SAFE/USFW/xxxxxxxx
- e. The transfer agent must be contacted to confirm that all the necessary paperwork has been completed before instructing the DWAC. Please also note that alternatively to SWIFT MT540/MT542 settlement messages, clients can instruct DWAC via SWIFT MT565 asset servicing messages. Please refer to [CBL Client Handbook](#) for further information.
- f. In the case of a two-sided DWAC (for example, when Reg S tranches are being exchanged for Rule 144A tranches or vice-versa), the counterparty's name and telephone number must be entered. If Reg S tranches are being exchanged for Rule 144A tranches, clients should make DWAC withdrawal of the Reg S tranche and their counterparty should make DWAC deposit of the Rule 144A tranche. In the case of a one-sided DWAC (used, for example, in conversions), the telephone number must be entered of the transfer agent who can confirm whether all the necessary paperwork has been completed.
- g. The shareholder registration name is mandatory only for shares priced at less than USD 1.00. There is a 78-character limitation for DTC.
- h. For conversions from Rule 144A into Reg S where Citibank London is acting as transfer agent, clients are requested to provide related instruction references via a free-format message to the Settlement team in charge of the U.S. market at the latest by 18:00 CET on SD-1. Clients are also requested, for conversions involving MMI issues only and where Citibank London is acting as transfer agent, to instruct via DTC counterparty 2952 as per standard book-entry instructions with counterparties in DTC.
- i. The Tax ID number is only required if the registered owner is a U.S. citizen; otherwise, "TAX ID 999999999" must be entered. If the Tax ID is populated with "0" instead of "9", the instruction will be rejected.
- j. A comma separator (,) must be present between each item and the order of details must be followed; Any other characters (hyphen, dash, slash...) used instead of the comma separator will cause rejection and settlement delay.
- k. 97A must be populated with DTCC number 3199. If 95P and 97A are populated, Counterparty's BIC will not be forwarded to the depository. Only the DTCC ID will be forwarded to the depository (:95R::REAG/DTCYID/3199. If 95P is populated without 97A for the BUYR, then Counterparty's BIC will be sent
- l. In the outbound message to the depository, the SAFE value provided in this field will be mapped to the REAG SAFE
- m. Please note: If the SAFE field is filled, the UNKNOWN value must also be completed. Furthermore, if both SAFE and UNKNOWN are filled, then the RECU field is also required.

	O	:97A::SAFE//Beneficiary's account	C	:97A::SAFE//Beneficiary's account <sup>e</sup>	O	:97A::SAFE//Beneficiary's account <sup>g</sup>	E1

- a. The Common Reference may be populated based on market practices and in coordination with local counterparties.
- b. If 97A is populated together with 95P for REI1, it must be populated with BPID code of the counterparty  
If 95P and 97A are populated for the REI1, Counterparty's BIC will not be forwarded to the depository. Only the BPID code will be forwarded to the depository (:95R::REAG/SCOM/BPID code)  
If 95P is populated without 97A for the REI1, then Counterparty's BIC will be forwarded to the depository. (:95P::REAG//Counterparty's BIC)
- c. BPID code = Business Partner Identification. Format is ccxxxxxx (where cc is the ISO country code) and this identifies the counterparty account at SIS.  
Important: The BPID code must be provided without DSS SCOM, that is, the client must input 97A::SAFE//ccxxxxxx and NOT 97A::SAFE/SCOM/ccxxxxxx.
- d. If 97A is populated together with 95P for REI1, it must be populated with CUID number (Customer Unique Identifier of the counterparty)  
If 95P and 97A are populated for the REI1, Counterparty's BIC will not be forwarded to the depository. Only the CUID will be forwarded to the depository (:95R::REAG/CDSL/CUID number)  
If 95P is populated without 97A for the REI1, then Counterparty's BIC will be forwarded to the depository. (:95P::REAG//Counterparty's BIC)
- e. If the counterparty is a financial institution or a bank, the account must be provided. The absence of the account in such cases may lead to settlement delays
- f. Please note: If the SAFE field is filled, the UNKNOWN value must also be completed. Furthermore, if both SAFE and UNKNOWN are filled, then the RECU field is also required.
- g. It is recommended to include the receiving account number to ensure that the receiving participant can recognise the delivery and settlement failure can be avoided.  
If the SAFE of BUYR is to be specified by the customer, then RECU containing 8-digit DTC participant number is required.  
If no SAFE of BUYR, then the 8-digit DTC participant number is to be mentioned in the BUYR and the DETCUS33XXX in the RECU
- h. If 97A is populated together with 95P for REI1, it must be populated with value DTCC  
If 95P and 97A are populated for the REI1, Counterparty's BIC will not be forwarded to the depository. Only DTCC will be forwarded to the depository (:95R::REAG/CDSL/ DTCC)  
If 95P is populated without 97A for the REI1, then Counterparty's BIC will be forwarded to the depository. (:95P::REAG//Counterparty's BIC)

- h. For conversions from Rule 144A into Reg S where Citibank London is acting as transfer agent, clients are requested to provide related instruction references via a free-format message to the Settlement team in charge of the U.S. market at the latest by 18:00 CET on SD-1. Clients are also requested, for conversions involving MMI issues only and where Citibank London is acting as transfer agent, to instruct via DTC counterparty 2952 as per standard book-entry instructions with counterparties in DTC.
- i. The Tax ID number is only required if the registered owner is a U.S. citizen; otherwise, "TAX ID 999999999" must be entered. If the Tax ID is populated with "0" instead of "9", the instruction will be rejected.
- j. A comma separator (,) must be present between each item and the order of details must be followed; Any other characters (hyphen, dash, slash...) used instead of the comma separator will cause rejection and settlement delay.
- k. 97A must be populated with DTCC number 3199. If 95P and 97A are populated, Counterparty's BIC will not be forwarded to the depository. Only the DTCC ID will be forwarded to the depository (:95R::REAG/DTCYID/3199. If 95P is populated without 97A for the BUYR, then Counterparty's BIC will be sent
- l. In the outbound message to the depository, the SAFE value provided in this field will be mapped to the REAG SAFE)
- m. Please note: If the SAFE field is filled, the UNKNOWN value must also be completed. Furthermore, if both SAFE and UNKNOWN are filled, then the RECU field is also required.

- a. The Common Reference may be populated based on market practices and in coordination with local counterparties.
- b. If 97A is populated together with 95P for REAG, it must be populated with BPID code of the counterparty.  
If 95P and 97A are populated for the REAG, Counterparty's BIC will not be forwarded to the depository. Only the BPID will be forwarded to the depository (:95R::REAG/SCOM/BPID code)  
If 95P is populated without 97A for the REAG, then Counterparty's BIC will be forwarded to the depository.(:95P::REAG//Counterparty's BIC)
- c. BPID code = Business Partner Identification. Format is ccxxxxx (where cc is the ISO country code) and this identifies the counterparty account at SIS.  
Important: The BPID code must be provided without DSS SCOM, that is, the client must input 97A::SAFE//ccxxxxx and NOT 97A::SAFE/SCOM/ccxxxxx.
- d. If 97A is populated together with 95P for REAG, it must be populated with CUID number (Customer Unique Identifier of the counterparty)  
If 95P and 97A are populated for the REAG, Counterparty's BIC will not be forwarded to the depository. Only the CUID will be forwarded to the depository (:95R::REAG/CDSL/CUID number)  
If 95P is populated without 97A for the REAG, then Counterparty's BIC will be forwarded to the depository.(:95P::REAG//Counterparty's BIC)
- e. If the counterparty is a financial institution or a bank, the account must be provided. The absence of the account in such cases may lead to settlement delays
- f. Please note: If the SAFE field is filled, the UNKNOWN value must also be completed. Furthermore, if both SAFE and UNKNOWN are filled, then the RECU field is also required.
- g. It is recommended to include the receiving account number to ensure that the receiving participant can recognise the delivery and settlement failure can be avoided.  
If the SAFE of BUYR is to be specified by the customer, then RECU containing 8-digit DTC participant number is required.  
If no SAFE of BUYR, then the 8-digit DTC participant number is to be mentioned in the BUYR (RECU is then not needed).
- h. If 97A is populated together with 95P for REAG, it must be populated with the value DTCC.  
If 95P and 97A are populated for the REAG, Counterparty's BIC will not be forwarded to the depository. Only the "DTCC" will be forwarded to the depository (:95R::REAG/CDSL/DTCC)  
If 95P is populated without 97A for the REAG, then Counterparty's BIC will be forwarded to the depository.(:95P::REAG//Counterparty's BIC)

- a. The Common Reference may be populated based on market practices and in coordination with local counterparties.
- b. 97A must populated together with 95P for DEAG, it must be populated with DTC ID code of the counterparty. Counterparty's BIC will not be forwarded to the depository. Only the DTC ID will be forwarded to the depository (:95R::DEAG/DTCYID/DTC id code)  
Important: The DTC code must be provided without DSS DTCYID, that is client must input 97A::SAFE//xxxx and NOT 97A::SAFE/DTCYID/xxxx
- c. 97A must populated together with 95P for DEAG, it must be populated with ABA number of the counterparty. Counterparty's BIC will not be forwarded to the depository. Only the ABA number will be forwarded to the depository (:95R::DEAG/USFW/counterparty's ABA number)  
Important: The Fedwire code must be provided without DSS USFW, that is, the client must input 97A::SAFE//xxxxxxxx and NOT 97A::SAFE/USFW/xxxxxxxx.
- d. The transfer agent must be contacted to confirm that all the necessary paperwork has been completed before instructing the DWAC. Please also not that alternatively to SWIFT MT540/MT542 settlement messages, clients can opt to instruct DWAC via SWIFT MT565 asset servicing messages. Please refer to [CBL Client Handbook](#) for further information.
- e. In the case of a two-sided DWAC (for example, when Reg S tranches are being exchanged for Rule 144A tranches or vice-versa), the counterparty's name and telephone number must be entered. If Reg S tranches are being exchanged for Rule 144A tranches, clients should make DWAC withdrawal of the Reg S tranche and their counterparty should make DWAC deposit of the Rule 144A tranche. In the case of a one-sided DWAC (used, for example, in conversions), the telephone number must be entered of the transfer agent who can confirm whether all the necessary paperwork has been completed.
- f. The shareholder registration name is mandatory only for shares priced at less than USD 1.00 USD. There is a 78 78-character limitation for DTC.
- g. For conversions from Rule 144A into Reg S where Citibank London is acting as transfer agent, clients are requested to provide related instruction references via a free-format message to the Settlement team in charge of the U.S. market at the latest by 18:00 CET on SD-1. Clients are also requested, for conversions involving MMI issues only and where Citibank London is acting as transfer agent, to instruct via DTC counterparty 2952 as per standard book-entry instructions with counterparties in DTC.
- h. The Tax ID number is only required if the registered owner is a U.S. citizen; otherwise, "TAX ID 999999999" must be entered. If the Tax ID is populated with "0" instead of "9", the instruction will be rejected.
- i. A comma separator (,) must be present between each item and the order of details must be followed; Any other characters (hyphen, dash, slash...) used instead of the comma separator will cause rejection and settlement delay.
- j. 97A must be populated with DTCC number 3199. If 95P and 97A are populated, Counterparty's BIC will not be forwarded to the depository. Only the DTCC ID will be forwarded to the depository (:95R::REAG/DTCYID/3199. If 95P is populated without 97A for the BUYR, then Counterparty's BIC will be sent
- k. In the outbound message to the depository, the SAFE value provided in this field will be mapped to the DEAG SAFE]
- l. Please note: If the SAFE field is filled, the UNKNOWN value must also be completed. Furthermore, if both SAFE and UNKNOWN are filled, then the DECU field is also required.

- a. The Common Reference may be populated based on market practices and in coordination with local counterparties.
- b. If Party 1 Safekeeping Account is populated, it must be populated with BPID code.  
If Party 1 BIC and Party 1 Safekeeping Account are populated, Counterparty's BIC will not be forwarded to the depository. Only the BPID code will be forwarded to the depository (:95R::DEAG/SCOM/BPID code)  
If Party 1 BIC is populated without Safekeeping Account, then Counterparty's BIC will be forwarded to the depository. (:95P::DEAG//Counterparty's BIC)
- c. BIPID code = Business Partner Identification. Format is ccxxxxx (where cc is the ISO country code) and this identifies the counterparty account at SIS.
- d. If a client uses a BIC8, Clearstream Banking shall be entitled to modify the BIC8 by adding the default XXX suffix to comply with T2S settlement rules. Accordingly, such clients remain liable for any settlement fails that the use of the BIC8 may cause.
- e. For cross-border transactions, the Place of Settlement must contain the BIC of the counterparty's CSD.
- f. If Party 1 BIC and Party 1 Safekeeping Account are populated, Counterparty's BIC will not be forwarded to the depository. Only the CUID number will be forwarded to the depository (:95R::DEAG/CDSL/CUID number)

- If Party 1 BIC is populated without Safekeeping Account, then Counterparty's BIC will be forwarded to the depository. (:95P::DEAG//Counterparty's BIC)
- g. If the counterparty is a financial institution or a bank, the account must be provided. The absence of the account in such cases may lead to settlement delays.
  - h. Providing a safekeeping account in this party is not allowed
  - i. "Electronic Treasury Order" must be communicated when buying shares directly from the issuer in the Trade details (only relevant for MT540).
  - j. If Party 1 BIC and Party 1 Safekeeping Account are populated, Counterparty's BIC will not be forwarded to the depository. Only the value ACSI will be forwarded to the depository (:95R::DEAG/CDSL/ACSI)

- a. The Common Reference may be populated based on market practices and in coordination with local counterparties.
- b. Party 1 Safe must populated together with Party 1 BIC, it must be populated with DTC ID code of the counterparty. Counterparty’s BIC will not be forwarded to the depository. Only the DTC ID will be forwarded to the depository (:95R::REAG/DTCYID/DTC id code)  
Important: The DTC code must be provided without DSS DTCYID, that is, the client must input DTCC ID code without DTCYID.
- c. Many U.S. counterparties request beneficiary account details and, to avoid settlement failure, clients are strongly urged to provide them.
- d. Party 1 Safe must populated together with Party 1 BIC, it must be populated with ABA number of the counterparty. Counterparty’s BIC will not be forwarded to the depository. Only the ABA number will be forwarded to the depository (:95R::REAG/USFW/counterparty’s ABA number)  
Important: The Fedwire code must be provided without DSS USFW, that is, the client must input 97A::SAFE//xxxxxxx and NOT 97A::SAFE/USFW/xxxxxxx
- e. The transfer agent must be contacted to confirm that all the necessary paperwork has been completed before instructing the DWAC. Please also note that alternatively to SWIFT MT540/MT542 settlement messages, clients can instruct DWAC via SWIFT MT565 asset servicing messages. Please refer to [CBL Client Handbook](#) for further information.

- f. In the case of a two-sided DWAC (for example, when Reg S tranches are being exchanged for Rule 144A tranches or vice-versa), the counterparty's name and telephone number must be entered. If Reg S tranches are being exchanged for Rule 144A tranches, clients should make DWAC withdrawal of the Reg S tranche and their counterparty should make DWAC deposit of the Rule 144A tranche. In the case of a one-sided DWAC (used, for example, in conversions), the telephone number must be entered of the transfer agent who can confirm whether all the necessary paperwork has been completed.
- g. The shareholder registration name is mandatory only for shares priced at less than USD 1.00. There is a 78-character limitation for DTC.
- h. For conversions from Rule 144A into Reg S where Citibank London is acting as transfer agent, clients are requested to provide related instruction references via a free-format message to the Settlement team in charge of the U.S. market at the latest by 18:00 CET on SD-1. Clients are also requested, for conversions involving MMI issues only and where Citibank London is acting as transfer agent, to instruct via DTC counterparty 2952 as per standard book-entry instructions with counterparties in DTC.
- i. The Tax ID number is only required if the registered owner is a U.S. citizen; otherwise, "TAX ID 999999999" must be entered. If the Tax ID is populated with "0" instead of "9", the instruction will be rejected.
- j. A comma separator (,) must be present between each item and the order of details must be followed; Any other characters (hyphen, dash, slash...) used instead of the comma separator will cause rejection and settlement delay.
- k. Empfaenger-P1 – SAC must be populated with 3199. Counterparty's BIC will not be forwarded to the depository. Only the DTC ID will be forwarded to the depository (:95R::REAG/DTCYID/DTC id code)  
Important: The DTC code must be provided without DSS DTCYID, that is, the client must input DTCC ID code without DTCYID.
- l. In the outbound message to the depository, the SAFE value provided in this field will be mapped to the REAG SAFE

- The Common Reference may be populated based on market practices and in coordination with local counterparties.
- If 97A is populated together with 95P for REAG, it must be populated with BPID code of the counterparty.  
If 95P and 97A are populated for the REAG, Counterparty's BIC will not be forwarded to the depository. Only the BPID will be forwarded to the depository (:95R::REAG/SCOM/BPID code)  
If 95P is populated without 97A for the REAG, then Counterparty's BIC will be forwarded to the depository. (:95P::REAG//Counterparty's BIC)
- BPID code = Business Partner Identification. Format is ccxxxxxx (where cc is the ISO country code) and this identifies the counterparty account at SIS.  
Important: The BPID code must be provided without DSS SCOM, that is, the client must input 97A::SAFE//ccxxxxxx and NOT 97A::SAFE/SCOM/ccxxxxxx.
- Please note: If the SAFE field is filled, the UNKNOWN value must also be completed. Furthermore, if both SAFE and UNKNOWN are filled, then the RECU field is also required.
- Providing a safekeeping account in this party is not allowed

- Party 1 Safekeeping Account must be populated together with Party 1 BIC, it must be populated with BPID code of the counterparty. Counterparty's BIC will not be forwarded to the depository. Only the BPID will be forwarded to the depository.
- BPID code = Business Partner Identification. Format is ccxxxxx (where cc is the ISO country code) and this identifies the counterparty account at SIS. Important: The BPID code must be provided without DSS SCOM, that is, the client must input 97A::SAFE//ccxxxxx and NOT 97A::SAFE/SCOM/ccxxxxx.
- Providing a safekeeping account in this party is not allowed

## C. Counterparty instruction with UCSA Service subscribed

	<b>M/O</b>	<b>CEU - CH</b>	<b>Sequence</b>
	M	:97A::SAFE//Domestic counterparty's account @CSD	C
	O	:20C::COMM//Common reference	A1
	M	:98a::TRAD//Trade date	B
	M	:95P::PSET//INSECHZZXX	E1
	M	:95R::DEAG/SCOM/LU101193	E1
	O	:95P::SELL//BIC of Counterparty in CEU	E1
	O	:97A::SAFE//UCSA account number linked to the CEU client	E1

a. The Common Reference may be populated based on market practices and in coordination with local counterparties.

	<b>Field</b>	<b>U.S. (DTC) – CEU</b>
	RECV-PT	0908
	RCVR-ACCT	089154 CSC[UCSA account number linked to the CEU client]
		OR
	RECV-PT	0908
	RCVR-ACCT	089154
	First comment line	CSCXXXXX [where XXXXX=UCSA account number linked to the CEU client]

	<b>Field</b>	<b>U.S. (Fedwire)- CEU</b>
	CONTRA	CITIBANK NYC/CUST ABA 021000089
	INF1 line	089154 CSCXXXXX [where XXXXX=UCSA account number linked to the CEU client]

	<b>Field</b>	<b>CA - CEU</b>
	CDS transfer to CUID code	RBCT (for Royal Bank of Canada)
	Account	080000630001
	Memo line	/XXXXX [where XXXXX=UCSA account number linked to the CEU client]

Field	book-entry from the DTC to the CDS (Northbound Flips) - free of payment
Deliver to	DTC 00005099
Using CUID code	RBCT (for Royal Bank of Canada)
In favour of	080000630001/XXXXX [where XXXXX=UCSA account number linked to the CEU client]

Field	by book-entry from the CDS to the DTC (Southbound Flips) - free of payment:
Receive from:	DTC 00006000
Using CUID code:	RBCT (for Royal Bank of Canada)
By order of:	080000630001/XXXXX [where XXXXX=UCSA account number linked to the CEU client]

Field	CH (T2S)-CEU (UBS funds)
Deliver to / Receive from	BIC UBSWCHZH80A (T2S SAC number INSE20001513) <sup>a</sup>
In favour of:	Clearstream BIC11 CEDELULLXXX and UCSA account number of the CEU customer <sup>b</sup>

a. The securities account number (SAC) is an optional matching criteria in T2S.

b. T2S does not report the account field with second party level in the allegation messages and we therefore recommend customers to request their counterparties to include the UCSA identifier number in field :70C::PACO instead of :97A::SAFE.

Field	CH (T2S)-CEU (all instruments)
-------	--------------------------------

Deliver to / Receive from	BIC CEDELULLGLB (T2S SAC number INSE20519508 <sup>a</sup> )
In favour of:	Clearstream BIC11 of the CEU client and account number of the CEU client <sup>b</sup>

a. The securities account number (SAC) is an optional matching criteria in T2S.

b. T2S does not report the account field with second party level in the allegation messages and we therefore recommend clients to request their counterparties to include the UCSA identifier client account number in field :70C::PACO instead of :97A::SAFE.

Field	CH – CEU via UBS
Domestic counterparties delivering securities in favour of a CEU client, free of or against payment, must provide information in their instruction to SIS as follows:	
Deliver to/ Receive from	UBS AG, Zurich, Account CH100025
In favour of/ By order of	Clearstream Banking S.A., Account xxxxx <sup>a</sup> [where XXXXX=UCSA account number linked to the CEU client]

a. This is an optional field in SIS and SIS ignores it for matching purposes. Counterparties are requested nevertheless to supply it.

## D. Counterparty instruction without UCSA Service subscribed

	M/O	CEU - CH	M/O
	M	:97A::SAFE//Domestic counterparty's account @CSD	C
	O	:20C::COMM//Common reference <sup>a</sup>	A1
	M	:98a::TRAD//Trade date	B
