Clearstream Banking AG - Fee Schedule

1. General

This document sets out the fees for services on the German domestic business offered by Clearstream Banking.

1.1 Validity

This Fee Schedule is **valid from 1 July 2007** until further notice. Changes to the Fee Schedule are communicated to the customers via Announcements and will be available on our web site, www.clearstream.com.

1.2 Accounting

Unless otherwise indicated, all services are quoted in basis points (1 bp = 0.01 percent) and are invoiced in EUR. The fees are net and will be invoiced plus the German statutory value-added tax (VAT) unless otherwise stated.

1.3 Terms of payment

Invoicing is carried out monthly. Clearstream Banking advises customers of the total amount of fees payable at the beginning of the month following the invoice period. That amount is debited from a customer's account on the 5th working day of the month.

1.4 Concept of central invoice recipient

Clearstream offers its customers the possibility of grouping accounts of headquarters and branches or subsidiary entities for a consolidated invoicing. Customers opting to use this service will receive one invoice for all related accounts. The account consolidation can result in additional volume discount.

2. Main principles, explanations and examples

2.1 Safekeeping services

- The fees for safekeeping services are calculated on an annual basis and invoiced monthly pro rata, plus the applicable rate of statutory value-added tax (VAT).
- Sliding scales apply to the calculation of fees for safekeeping services.
- The safekeeping fees for the safe custody positions on Xemac sub-accounts are calculated separately.
- No safekeeping service fee is invoiced for securities denominated in Reichsmark or for subscription rights.
- The valuation of positions held in equities, warrants, zero bonds, book-entry securities rights, investment fund units, and similar instruments is at market prices.
- The valuation of positions held in fixed-rate Eurobonds, fixed-rate convertibles, other fixed-rate bonds and notes, floating-rate notes (FRN), Certificates of Deposit (CD), Commercial Paper (CP), Euro Commercial Paper, and all other notes and bonds is at nominal value.

Should there be no price for a security, substitute parities are used to value the securities account balance (see annex 2).

All prices are quoted in basis points (1 bp = 0.01 percent).

2.1.1 Categories within safekeeping services fees

The decisive factor for the assignment of the securities to the respective categories is the information in the WSS (securities master data system) fields: "Verwahrmöglichkeit" and "Wertpapiergruppe" (custody option and securities classes - see annex 1).

Bonds, notes and similar debt instruments, and equities quoted as a percentage are broken down into two categories, i.e.:

- category I: bonds and notes, zero bonds and similar debt instruments quoted as a percentage or thousandth, evidenced by individual certificates;
- category II: bonds and notes, zero bonds and similar debt instruments quoted as a percentage or thousandth, evidenced by permanent global certificates.

Other categories in safekeeping are:

- equities, investment fund units and similar instruments quoted in units, evidenced by individual certificates or permanent global certificates;
- warrants, and
- non-German securities held in collective safe custody.

2.1.2 Sliding scales for safekeeping services fees

The example below gives the rationale for the sliding scales for safekeeping services fees.

Example: positions in a securities account total nominal value pro rata 35,000 million EUR in debt instruments of category I; according to the sliding scales, the safekeeping services fee is calculated as follows:

Account deposit value (in EUR million) nominal value		Partial volume of positions (in EUR million)	Corresponding fee in basis points (in EUR million)	Partial fee (EUR)
from	to			
0	500	500	0.800	40,000
500	3,000	2,500	0.700	175,000
3,000	6,000	3,000	0.600	180,000
6,000	12,000	6,000	0.500	300,000
12,000	25,000	13,000	0.450	585,000
25,000	50,000	10,000	0.325	325,000
Total for the year		35,000		1,605,000
				1,605,000 / 12
Monthly charge				133,750

2.1.3 Pro rata calculation of securities positions

The example below gives the rationale for calculating the pro rata securities positions.

Date	Position	No. of days relevant to the calculation	Pro rata calculation of positions
01.10.2006	10,000	01	1 x 10,000
02.10.2006	15,000	12	12 x 15,000
14.10.2006	12,000	01	1 x 12,000
15.10.2006	5,000	06	6 x 5,000
21.10.2006	10,000	04	4 x 10,000
25.10.2006	20,000	05	5 x 20,000
30.10.2006	15,000	02	2 x 15,000
Pro rata total of positions		31	402,000
Positions pro rata temporis			402,000/31=12,968

The pro rata positions are Clearstream Banking AG's basis for computation, i.e. the nominal values on each day of a month are added and divided by the number of calendar days of each month respectively.

2.2 Securities settlement and cash services

The fees for securities settlement and cash services are not linked to the fees for safekeeping services.

Prices for securities transactions can be found under 4.1 Stock exchange trades, 4.2 OTC transactions and 4.4 Other securities transactions. For transactions against payment (DVP) the cash transfer is charged separately (see 4.3).

General rules for charging fees for securities settlement and cash services are:

- the fee for transfers are calculated for each book entry;
- the invoicing occurs monthly, including the applicable rate of German statutory value-added tax (VAT) unless otherwise specified;
- rebates are applied on the monthly invoice based on transactions volume.

2.2.1 Example for the fee calculation for securities settlement and cash services (chapter 4)

Stock Exchange transactions

Number of transactions per month	Reference	Description	Securities settlement price	Cash services price	Securities settlement fee	Cash service fee	Total fee	Rebate eligible under 7.1 or 7.2	Rebate	Fee including rebate

2,950										

2.3 Communication

The fee for communication services differs depending on the communication channel used. Clearstream Banking offers communication via the online interfaces Cascade Host and Cascade PC, remote data transfer via a dedicated line and the use of the SWIFT-network.

For the technical connection an additional fee is charged by Deutsche Börse Systems (DBS) for CASCADE and the file transfer system or by SWIFT for the SWIFT-network.

General rules for charging fee for communication services are:

- the invoicing occurs monthly, including the applicable rate of German statutory value-added tax (VAT)
- rebates are applied on the monthly invoice based on the volume.

This page has intentionally been left blank.

Annex 2 - Pricing procedure for calculating safekeeping fees

Data basis

Basis for pricing is currently the securities master data system (Wertpapier Service System - WSS). The controlling WSS tables are

- WSS-Tabelle G17 -- Custody option
- WSS-Tabelle G06 -- Security type

Price currency

Price fixing is in EUR as a matter of policy.

For securities classes in foreign currencies the price fixed is multiplied by the corresponding forex rate of the price of the corresponding security.

Sequence of stock exchanges for price fixing

Stock exchanges are searched in the sequence below:

Abbreviation	Designation
EDE	Xetra
EDF	Frankfurt
EDD	Dusseldorf
EDM	Munich
EDH	Hamburg
EDB	Berlin
EDS	Stuttgart
EDI	Hanover
EDC	Bremen
EDX	Retail investment/specialised investment funds
ED	Private placement (Germany) / bonds area = short term notes / derivatives trading = prices quoted by floor specialists / Federal Treasury short-term notes = calculated prices (maturity + discount rate)
EUA	Trading in Eurobonds
ELL	Luxembourg Stock Exchange
EDT	Derivatives exchange
Home market	Corresponding entry in the securities master data (foreign securities only)
Any other foreign stock exchange	

Prices types

The price types given in the annex of the invoice are as below:

Nominal value (N)

The nominal value is the basis for calculating safekeeping fees for bonds, where they are listed as a percentage and thousandth.

End-of-month price (U)

The price quality and sequence of the stock exchanges follow the end-of-month price.

If no end-of-month price can be found for a called month, the price calculation module tries to establish the next current daily price within the month requested.

Annual price for tax purposes (S)

The annual price for tax purposes is contained in the securities master data. There is only one annual price for tax purposes per securities class. The annual price for tax purposes may not be older than the date of the most recent year-end, exception: January processing.

If it is the annual price for tax purposes which is being calculated, the annual forex price for tax purposes is worked out using the relevant currency. Otherwise the daily forex price/the annual forex price for tax purposes is calculated using the currency of listing, taking "Frankfurt" as stock exchange market into account.

Rules for substitute parities (R)

For securities classes which are evaluated according to the market value and for which there are no end-of-month prices and annual prices for tax purposes, there are fixed rules (substitute parities). These are controlled via the security type. An explanation of them is given in annex 3.

Annex 3 - Substitute parities to value securities with no current market price (only available in German language)
