Foreword

The Published Fund List is Clearstream Banking's service providing customers with automated daily reporting on investment funds reference data. The Published Fund List is designed and developed to help Vestima users overcome the challenges of maintaining investment funds reference data and to mitigate issues with the operational efficiency of the placement and settlement of Vestima orders.

These specifications cover the layout and use of an outbound Comma Separated Value (CSV) file. For further information, please contact Vestima Customer Services (see below).

Contact details

For further information on the Published Fund List or any other information you may require, or if you have questions regarding the Order Routing system and/or communications with Clearstream Banking, you can contact Client Services in Luxembourg as follows:

If you need assistance with Vestima, it would be helpful if you have the following information to hand before contacting Clearstream Banking:

- Your organisation name and Vestima Identity (ID);
- Your name, telephone and fax numbers and your email address;
- The make and model of your PC;
- Your connection type: via the CreationOnline portal or directly through the public internet;
- The type and version of your operating system and web browser software;
- Details of the inquiry (please have full details available);
- If you receive an error message, full details of the error, with any error message number.

Participants should note that - as is normal practice within financial organisations - Clearstream Banking has implemented telephone line recording to ensure that the interests of Clearstream Banking and of its participants are protected against misunderstandings or miscommunications.

Areas subject to telephone line recording include Customer Service, the Treasury Dealing Room and back office operations. The recorded lines are the subject of an ongoing formal maintenance and quality control programme to ensure their continued effective and appropriate deployment and operation.

1. Introduction

The Published Fund List service optimises efficiency by offering:

- A central source of investment funds reference data for daily order placement and settlement needs;
- Timely alignment of changes in investment funds reference data in a secure and automated way.

Note: A version of the standard fund list report, updated monthly, is available on the Clearstream website under Vestima documentation / [Supported funds](#).

Connectivity

The Published Fund List report can be retrieved in either of two ways:

- Downloaded through the Vestima web-browser interface; and
- Through Xact File Transfer via Internet.

For further information about accessing and using these applications, please see [“Contact details”](#) on page 1-i.

File names

The name of the Published Fund List report depends on how it is retrieved:

- If you download the report from Vestima, you are prompted to name it when saving it to a local storage device.
- Each report in Xact File Transfer via Internet is given a unique file name.

File content records and fields

The following specifications are adhered to:

- Each line in the data file is a record comprising a fixed number of fields (values).
- There are individual “record types” for data file header and body.
- A data file has one header record containing column headings, and multiple body records containing fund data.
- All records have a fixed number of fields.
- Fields in all records are separated by a comma (,) character.
- All fields are represented in the record, regardless of content. Two adjacent commas or double quotation (”) characters (with nothing between them) denote an empty field.
- Each line in a data file is terminated by a line feed (LF 0x0a).

1. Introduction

Format codes

The following codes and symbols are used to describe the formats that are used in the respective fields:

numerals 0 to 9	The length of a field (not counting field separators, decimal separators or any double quotation characters used as delimiters or “escape” characters)
!	The length of the field is fixed
n	Numeric, unsigned
a	Upper-case alphabetic (A to Z)
c	Alphanumeric (upper-case A to Z and 0 to 9)
x	Any character
time	Time expressed in 24-hour clock system, formatted as HH:MM
date	Date, month or date and time, formatted as DD/MM/YYYY
[]	Option, used only when needed

Numerical data

The decimal separator is a full stop (.) character (0x2e) and there is no thousands separator. The maximum lengths of the numerical fields refer to the number of digits (integers, decimals) without counting any decimal separator and/or negative sign that may be present. Positive numeric values are always unsigned.

Text data

Double-quotation mark (") characters (0x22) are used as delimiters for all fields except those containing numerals or dates. An embedded double-quotation mark within a field is “escaped” using an adjacent double-quotation mark.

The maximum lengths of the text fields refer to the number of characters without counting the double-quotation marks used as delimiters or “escape” characters.

Standards

The following international standards are applicable:

- ISO 4217 defines the currency code.
- ISO 6166 defines the International Securities Identifying Number (ISIN).
- ISO/IEC 8859-1 (also known as Latin-1) defines the character set for fields that have “x” as the format code.

2. Published Fund List - file specifications

Published Fund List is available on a daily basis as:

- Standard report providing Vestima fund reference data;
- Delta report providing Vestima fund reference data and showing which attributes have changed compared to the previously generated report.

Each row in the specifications table below is referenced by a letter in the “Column” column. This corresponds to the column references when opening a file in standard spreadsheet software¹.

The “M/O” column indicates the usage of each field:

- M indicates mandatory² - information is always present
- O indicates optional - information is present when available or applicable.

Note: A version of the standard report, updated monthly, is available on the Clearstream website under Vestima documentation / [Supported funds](#).
