Stock Exchange Transactions Go OTC (SET-GO)

Registration migration reporting

Dear Sir or Madam.

During the execution of SET-GO ICSD Migration (Phase 1) and the CSD Migration (Phase 2), CBF can transmit a dedicated reporting for pending Stock Exchange instructions. On customer demand, the migration reporting can be requested using the attached form, which is only available in English.

The form provides customers the possibility to request the migration reporting for customer simulation and production for both phases. The report language will be according to customers' reporting pre-settings in the CBF account master – either English or German.

Please note the following due dates:

- Phase 1 (ICSD Migration)
 - For a participation in simulation the form has to be returned by 27 August 2021.
 The request for migration reporting can be sent via email (<u>T2S-Support@clearstream.com</u>).
 - For production launch the form has to be returned by 8 October 2021.
 A hard copy of the form with legally binding signature(s) must be sent via mail to Clearstream¹.
- Phase 2 (CSD Migration)
 - For a participation in simulation the form has to be returned by 17 December 2021.

 The request for migration reporting can be sent via email (T2S-Support@clearstream.com).
 - For production launch the form has to be returned by 29 April 2022.
 A hard copy of the form with legally binding signature(s) must be sent via mail to Clearstream¹.

If at least one migration report for the migration in production is ordered, the customers are obliged to provide a hard copy. Customers need to submit the filled form according to the due dates defined above. Registration forms received after the announced deadlines will be processed on best effort basis and Clearstream cannot guarantee a timely setup. The SET-GO Customer Readiness team will inform the customer via email once the production settings are enabled – no separate information for the simulation environment will be distributed.

The following table provides an overview of the SET-GO migration reports available in customer simulation and production for ICSD Migration (Phase 1) and CSD Migration (Phase 2):

Kind regards
