## Collection Description

OneClearstream - CBPR+ Customers (SR2025) ([link](#))

This is the Cross-Border Payment and Reporting Collection part of Standards Release November 2025 for Clearstream.

## Usage Guideline Description

CBPRPlus-camt.058.001.08\_NotificationToReceiveCancellationAdvice ([link](#))

Principles:

### 1) AGENTS IDENTIFICATION - Textual Rules

-----

-> If BICFI is present, then (Name & Postal Address) is NOT allowed  
(ClearingSystemMemberIdentification and LEI may complement) – However, in case of conflicting information, the BICFI will always take precedence.

-> If BICFI is absent, (Name & Postal Address) OR [(Name & Postal Address) and ClearingSystemMemberIdentification] must be present.

Exception: If BICFI is absent, whenever Debtor Agent, Creditor Agent and all agents in between are located within the same country, the clearing code only may be used.

### 2) Character Set:

All proprietary and Text fields EXCLUDING Name and Address for all actors and Related Remittance Information and Remittance are limited to the FIN-X-Character set.

All Name and Address for all actors, Related Remittance Information and Remittance Information (structured and unstructured), Email Address where included as part of a proxy element are extended to support the following additional characters:

!#\$%&\*=^\_`{|}~";<>@[\\]

< is replaced with &lt;

> is replaced with &gt;

### 4. CBPR\_Agent\_PointToPointOnSWIFT:

If the transaction is exchanged on the SWIFT network (ie if the instructing agent/sender and instruted agent/receiver of the message are on SWIFT), then BICFI is mandatory and other

elements are optional, eg LEI.

## Outline

In the Collection OneClearstream - CBPR+ Customers (SR2025), the message CBPRPlus-camt.058.001.08\_NotificationToReceiveCancellationAdvice is composed of a mandatory Business Application Header V02 (head.001.001.02) and a Document.

### **Business Application Header V02 (head.001.001.02)**

The Business Application Header V02 (head.001.001.02) is composed of 15 elements.

#### **a - Character Set**

Contains the character set of the text-based elements used in the Business Message.

#### **b - From**

The sending MessagingEndpoint that has created this Business Message for the receiving MessagingEndpoint that will process this Business Message.

Note the sending MessagingEndpoint might be different from the sending address potentially contained in the transport header (as defined in the transport layer).

#### **c - To**

The MessagingEndpoint designated by the sending MessagingEndpoint to be the recipient who will ultimately process this Business Message.

Note the receiving MessagingEndpoint might be different from the receiving address potentially contained in the transport header (as defined in the transport layer).

#### **d - Business Message Identifier**

Unambiguously identifies the Business Message to the MessagingEndpoint that has created the Business Message.

#### **e - Message Definition Identifier**

Contains the MessageIdentifier that defines the BusinessMessage.

It must contain a MessageIdentifier published on the ISO 20022 website.

example camt.001.001.03.

#### **f - Business Service**

Specifies the business service agreed between the two MessagingEndpoints under which rules this Business Message is exchanged.

To be used when there is a choice of processing services or processing service levels.

Example: E&I.

#### **g - Market Practice**

Specifies the market practice to which the message conforms. The market practices are a set of rules agreed between parties that restricts the usage of the messages in order to achieve better STP (Straight Through Processing) rates.

A market practice specification may also extend the underlying message specification by

using extensions or supplementary data of this underlying message.

**h - Creation Date**

Date and time when this Business Message (header) was created.

**i - Business Processing Date**

Processing date and time indicated by the sender for the receiver of the business message.

This date may be different from the date and time provided in the CreationDate.

Usage: Market practice or bilateral agreement should specify how this element should be used.

**j - Copy Duplicate**

Indicates whether the message is a Copy, a Duplicate or a copy of a duplicate of a previously sent ISO 20022 Message.

**k - Possible Duplicate**

Flag indicating if the Business Message exchanged between the MessagingEndpoints is possibly a duplicate.

If the receiving MessagingEndpoint did not receive the original, then this Business Message should be processed as if it were the original.

If the receiving MessagingEndpoint did receive the original, then it should perform necessary actions to avoid processing this Business Message again.

This will guarantee business idempotent behaviour.

NOTE: this is named "PossResend" in FIX - this is an application level resend not a network level retransmission.

**l - Priority**

Relative indication of the processing precedence of the message over a (set of) Business Messages with assigned priorities.

**m - Signature**

Contains the digital signature of the Business Entity authorised to sign this Business Message.

**n - Related**

Specifies the Business Application Header(s) of the Business Message(s) to which this Business Message relates.

Can be used when replying to a query; can also be used when canceling or amending.

**o - CrossElementComplexRule : RelatedPresentWhenCopyDupl**

Related MUST contain the relevant BusinessMessageHeader elements of the BusinessMessage to which this BusinessMessage relates.

If CopyDuplicate is present, then Related MUST be present.

**Document - Notification To Receive Cancellation Advice V08 (camt.058.001.08)**

The Document - Notification To Receive Cancellation Advice V08 (camt.058.001.08) is composed of 4 elements.

**a - Group Header**

Set of elements used to provide further details on the message.

**b - Original Notification**

Set of elements used to identify the original notification, to which the cancellation advice refers.

**c - Cancellation Reason**

Reason for the cancellation of the notification.

**d - Supplementary Data**

Additional information that cannot be captured in the structured elements and/or any other specific block.
